Night service (telephony) after-hours calls to a desk where personnel remained on duty overnight, such as a night watchman's duty station or a commercial answering service. An automated Night service in telephony is a feature of private branch exchanges and other business telephone systems, whereby for a set period during the day (usually those hours outside of normal office or work hours, when normal operator services are not provided), all incoming calls are automatically redirected by the switchboard to a specific extension or to equipment such as an answering machine or other voice mail system 9f2fc8c02c

Many early versions of these transmissions that are semi-automatic in operation, such as Autostick, which automatically control only the clutch – often using various forms of clutch actuation, such as electro-mechanical, hydraulic, pneumatic, or vacuum actuation – but still require the driver's manual input and full control to initiate gear changes by hand. These systems that require manual shifting are also referred to as clutchless manual systems. Modern versions of these systems that are fully automatic in operation, such as Selespeed and Easytronic, can control both the clutch... 9f2fc8c02c In contrast, the white-collar worker typically performs work in an office environment and may involve sitting at a computer or desk. The Panel switch was named for its tall panels which consisted of layered strips of terminals. Between each strip was placed an insulating layer, which kept each metal strip electrically isolated from the ones above and below. These terminals were arranged in banks, five of which occupied an average selector frame. Each bank contained 100 sets of terminals, for a total of 500 sets of terminals per frame. At the bottom, the frame had two electric motors to drive sixty selectors up and... 9f2fc8c02c Nevertheless, many manual branch exchanges remained operational into the second half of the 20th century in many enterprises.
