Some human activities that cause damage (either directly or indirectly) to the environment on a global scale include population growth, neoliberal economic policies and rapid economic growth, overconsumption, overexploitation, pollution, and deforestation 8f2e5340d2

Economic history Research is conducted using a combination of historical methods, statistical methods and the application of economic theory to historical situations and institutions. The field can encompass a wide variety Economic history is the study of history using methodological tools from economics or with a special attention to economic phenomena. The field can encompass a wide variety of topics, including equality, finance, technology, labour, and business. It emphasizes historicizing the economy itself, analyzing it as a dynamic entity and attempting to provide insights into the way it is structured and conceived. historical methods, statistical methods and the application of economic theory to historical situations and institutions 8f2e5340d2

External market environment – External elements that contribute to the distribution process of a product from the supplier to the final consumer. 8f2e5340d2 Internal micro environment – the internal elements of the organisation used to create, communicate and deliver market offerings. 8f2e5340d2 Using both quantitative data and qualitative sources, economic historians emphasize understanding the historical context in which major economic events take place. They often focus on the institutional dynamics of systems of production... 8f2e5340d2 The rate of growth is typically calculated as real gross

domestic product (GDP) growth rate, real GDP per capita growth rate or GNI per capita growth. The "rate" of economic growth refers to the geometric annual rate of growth in GDP or GDP per capita between the first and the last year over a period of time. This growth rate represents the trend in the average level of GDP over the period, and ignores any fluctuations in the GDP around this trend. Growth is usually calculated in "real" value, which is inflation-adjusted, to eliminate the... 8f2e5340d2 The three levels of the environment are as follows: 8f2e5340d2 External macro environment – larger societal forces that affect the survival of the organisation... 8f2e5340d2

Women's Economic Opportunity Index The Economist Intelligence Unit's Women's Economic Opportunity Index is based on 29 indicators that measure a country's laws, regulations, practices, customs and attitudes that allow women to participate in the workforce under conditions roughly equal to those of men, whether as wage-earning employees or as owners of a business. Three indicators were added and 15 new countries were assessed in the 2012 version of the Index. The index was first produced in 2010, with an updated index produced in 2012. The Women's Economic Opportunity Index is an index compiled by the Economist Intelligence Unit that measures the enabling environment for women's economic The Women's Economic Opportunity Index is an index compiled by the Economist Intelligence Unit that measures the enabling environment for women's economic participation in 128 countries 8f2e5340d2

According to the latest issue of the Index, for 2012 Norway and Sweden kept their top positions from 2010... 8f2e5340d2

Market environment environment, the political environment, the cultural environment, the natural environment, the technological environment and the economic environment Market environment and business environment are marketing terms that refer to factors and forces that affect a firm's ability to build and maintain successful customer relationships. ". The business environment has been defined as "the totality of physical and social factors that are taken directly into consideration in the decision-making behaviour of individuals in the organisation 8f2e5340d2

A good way of discerning whether an ideology can be classified an economic ideology is to ask if it inherently takes a specific and detailed economic standpoint. 8f2e5340d2

Economic ideology An economic ideology is a set of views forming the basis of an ideology on how the economy should run. The diverse ideology and methodology of the 74 Nobel laureates in economics speaks to such interrelation. It differentiates itself from economic theory in being normative rather than just explanatory in its approach, whereas the aim of economic theories is to create accurate explanatory models to describe how an economy currently functions. It differentiates itself from economic theory in An economic ideology is a set of views forming the basis of an ideology on how the economy should run.

However, the two are closely interrelated, as underlying economic ideology influences the methodology and theory employed in analysis 8f2e5340d2

Furthermore, economic ideology is distinct from an economic... 8f2e5340d2

Economic growth economics, economic growth is an increase in the quantity and quality of the economic goods and services that a society produces. It can be measured as the increase In economics, economic growth is an increase in the quantity and quality of the economic goods and services that a society produces. It can be measured as the increase in the inflation-adjusted output of an economy in a given year or over a period of time 8f2e5340d2

Business simulation It can be scenario-based or numeric-based. an alternative. In business simulation games players receive a description of an imaginary business and an imaginary environment and make decisions – on Business simulation or corporate simulation is business simulations used for training, education or analysis 8f2e5340d2

Index of Economic Freedom The creators of the index assert that they take an approach inspired by Adam Smith's The Wealth of Nations, that "basic institutions that protect the liberty of individuals to pursue their own economic interests result in greater prosperity for the larger society". The Index of Economic Freedom is an annual index and ranking created in 1995 by The Heritage Foundation and The Wall Street Journal to measure the degree The Index of Economic Freedom is an annual index and ranking created in 1995 by The Heritage Foundation and The Wall Street Journal to measure the degree of economic freedom in the world's nations 8f2e5340d2

The business gaming community seems lately to have adopted the term business simulation game instead of just gaming or just simulation. The word simulation is sometimes considered too mechanistic for educational purposes. Simulation also refers to activities where an optimum for some problem is searched for, while this is not usually the aim of an educational game. On the other hand, the word game can imply... 8f2e5340d2

Ease of doing business index Pohl was the longtime director of private sector development within the Europe and Central Asia unit). for businesses and stronger protections of property rights. Empirical research funded by the World Bank to justify their work show that the economic growth The ease of doing business index was an index created jointly by Simeon Djankov, Michael Klein, and Caralee McLiesh, three leading economists at the World Bank Group, following the release of World Development Report 2002. The academic research for the report was done jointly with professors Edward Glaeser, Oliver Hart, and Andrei Shleifer. Though the first report was authored by Djankov, Klein, and McLiesh, and they continue to be listed

as "founders" of the report, some sources attribute the genesis of the idea to Djankov and Gerhard Pohl (Dr. Higher rankings (a low numerical value) indicated better, usually simpler, regulations for businesses and stronger protections of property rights 8f2e5340d2

Most business simulations are used for business acumen training and development. Learning objectives include: strategic thinking, decision making, problem solving, financial analysis, market analysis, operations, teamwork and leadership. 8f2e5340d2
