Sanitation Sanitation systems aim to protect human health by providing a clean environment that will stop the transmission of disease, especially through the fecal-oral route. management". For example, diarrhea, a main cause of malnutrition and stunted growth in children, can be

reduced through adequate sanitation. Preventing human contact with feces is part of sanitation, as is hand washing with soap. There are many other diseases which are easily transmitted in communities that have low levels of sanitation, such as ascariasis (a type of intestinal worm infection or helminthiasis), cholera, hepatitis, polio, schistosomiasis, and trachoma, to name just a few. Another definition is in the DFID guidance manual on water supply and sanitation programmes from 1998: “For the purposes of this manual, Sanitation refers to public health conditions related to clean drinking water and treatment and disposal of human excreta and sewage”

Emergency sanitation proper management of human fecal matter along with the public health of people struck with disaster. There are three phases of emergency response: Immediate, short term and long term. In the immediate phase, the focus is on managing open defecation, and toilet technologies might include very basic latrines, pit latrines, bucket toilets, container-based toilets, chemical toilets. Providing handwashing facilities and management of fecal sludge are also part of emergency sanitation. The short term phase might also involve technologies such as urine-diverting dry toilets, septic tanks, decentralized wastewater systems. They concluded that the current sanitation solutions were Emergency sanitation is the management and technical processes required to provide sanitation in emergency situations. Emergency sanitation is required during humanitarian relief operations for refugees, people affected by natural disasters and internally displaced

Logistics Whereas a third-party logistics (3PL) service provider targets a single function, a 4PL targets management of the entire process Logistics is the part of supply chain management that deals with the efficient forward and reverse flow of goods, services, and related information from the point of origin to the point of consumption according to the needs of customers. comprehensive supply chain solutions. Logistics management is a component that holds the supply chain together. The resources managed in logistics may include tangible goods such as materials, equipment, and supplies, as well as food and other edible items 39bff32baf

It is concerned with managing an entire production system that converts inputs (in the forms of raw materials, labor, consumables, and energy) into outputs (in the form of goods and services for consumers). Operations management covers sectors like banking systems, hospitals, companies, working with suppliers, customers, and using technology. Operations is one of the major functions in an organization along with supply chains, marketing, finance and human resources. The operations function requires management of both the strategic and day-to-day production of goods and services. 39bff32baf Throughout this, fundamental shifts are taking place in how the global production and supply network operates through ongoing automation of traditional manufacturing... 39bff32baf

Facet (psychology) Facets were originally elaborated only for the neuroticism, openness to experience, and extraversion traits; Costa and McCrae introduced facet scales for the agreeableness and conscientiousness traits in the Revised NEO-PI (NEO PI-R). The use of facets and facet scales has since expanded beyond the NEO PI-R, with alternative facet and domain structures derived from other models of personality. Each of the Big Five personality traits in the five factor model contains six facets, each of which is measured with a separate scale. Facets were originally elaborated only for the In psychology, a facet is a specific and unique aspect of a broader personality trait. Both the concept and the term "facet" were introduced by Paul Costa and Robert McCrae in the first edition of the NEO-Personality Inventory (NEO-PI) Manual.
