= 08f3df89af a 08f3df89af From the 8th or 9th century onwards, Muslims increasingly believed that the day of the Greater Resurrection would be announced by several signs of an impending apocalypse. Such beliefs are recorded and elaborated upon in apocalyptic literature, which introduced new figures absent in the Quran, such as the Dajjal (Antichrist) and... 08f3df89af

Al-Nawawi Despite this, he authored numerous and lengthy works ranging from hadith, to theology, biography, and jurisprudence that are still read to this day. Writing Yahya ibn Sharaf al-Nawawi (Arabic: يحيى بن شرف النووي, romanized: Yaḥyā ibn Sharaf al-Nawawī; (631A. Ulama's praise him for 3 characteristics: His level of scholarship. contemplating on the interacted and complex issues and in finding their solutions. Al-Nawawi died at the relatively early age of 45. H-676A. H) (October 1230–21 December 1277) was a Sunni Shafi'ite jurist and hadith scholar. Al-Nawawi, along with Abu al-Qasim al-Rafi'i, are leading jurists of the earlier classical age, known by the Shafi'i school as the Two Shaykhs (al-Shaykhayn) 08f3df89af

$$a_1x_1+\cdots+a_nx_n=b,$$
 08f3df89af n 08f3df89af He was in contact with various rulers of his time, and in this capacity he gained practical experience in cryptanalysis or the science of breaking encoded messages. He dedicated On Cryptanalysis, his only surviving work on the topic, to Al-Ashraf Musa (r. 1229–1237), the Ayyubid Emir of Damascus. He wrote three other books, including Al-Mu'lam (The Told [Book]), also on cryptanalysis, but it is now lost. On Cryptanalysis... 08f3df89af

Bilimbia Retrieved 21 March 2021. Wijayawardene, Nalin; Hyde, Kevin; Al-Ani, Laith Khalil Tawfeeq; Somayeh, Dolatabadi; Stadler, Marc; Haelewaters, Danny; et al. Bilimbia is a genus of lichen-forming fungi in the family Ramalinaceae. The genus is distinguished by its sessile apothecia (fruiting bodies) that range from light ochre to black, eight-spored asci, and

colourless spores with multiple cross-walls. The genus forms crustose (crust-like) lichens that appear as whitish-grey to grey patches on calcium-rich soils or mosses growing over alkaline surfaces. Molecular phylogenetics studies have confirmed that Bilimbia forms a well-supported monophyletic group within the Ramalinaceae, and as of 2025, it contains 24 accepted species

More than two million tons of citric acid are manufactured every year. It is used widely as acidifier, flavoring, preservative, and chelating agent. Soil consists of a solid collection of minerals and organic matter (the soil matrix), as well as a porous phase that holds gases (the soil atmosphere) and a liquid phase that holds water and dissolved substances both organic and inorganic, in ionic or in molecular form (the soil solution). Accordingly, soil is a complex three-state system of solids, liquids, and gases. Soil is a product of several factors: the influence of climate, relief (elevation, orientation, and slope of terrain), organisms, and the...

Soil Accordingly, soil is a complex three-state system of solids, liquids Soil, also commonly referred to as earth, is a mixture of organic matter, minerals, gases, water, and organisms that together support the life of plants and soil organisms. substances both organic and inorganic, in ionic or in molecular form (the soil solution). Some scientific definitions distinguish dirt from soil by restricting the former term specifically to displaced soil

,

Republic of Sudan (1956–1969) Ansar and the Khatmiyyah, Abdallah Khalil put together a coalition government. The Republic was disestablished when a coup led by Colonel Gaafar Nimeiry founded the Democratic Republic of Sudan in 1969. In 1958, after a military coup, General Ibrahim Abboud was installed as president. On December 19, 1955, the Sudanese parliament, under Ismail al-Azhari's leadership, unanimously adopted a declaration of independence that became effective on January 1, 1956. Major issues confronting Khalil's coalition government

included winning The Republic of Sudan was established as an independent sovereign state upon the termination of the condominium of Anglo-Egyptian Sudan, over which sovereignty had been vested jointly in Egypt and the United Kingdom. During the early years of the Republic, despite political divisions, a parliamentary system was established with a five-member Supreme Commission as head of state 08f3df89af

Islamic eschatology The former deals with the time between an individual's death and the Last Judgement. It is fundamental to Islam, as life after death is one of the religion's Six Pillars. Resurrection is divided into Lesser Resurrection (al-qiyamah al-sughra) and Greater Resurrection (al-qiyamah al-kubra). Islam acknowledges bodily resurrection. Only a few philosophers are an exception. seen as a rejection of salvation by them. According to Mohammad Hassan Khalil, on the subject of whether self-proclaimed non-Muslims might be allowed Islamic eschatology includes the afterlife, apocalyptic signs of the End Times, and Last Judgment 08f3df89af

Ibn Adlan He was also involved in literature and poetry, and taught on the Arabic language at the Al-Salihiyya Mosque of Cairo. Al-Kindi's book presents 'Afīf al-Dīn 'Alī ibn 'Adlān al-Mawsilī (Arabic: عفيف لدين علي بن عدلان الموصلي; CE), born in Mosul, was an Arab cryptologist, linguist and poet who is known for his early contributions to cryptanalysis, to which he dedicated at least two books. which is al-Mu'amma ('"The Book of Cryptographic Messages"), written by al-Khalil ibn Ahmad in the 8th century, but they are

now lost

Linear maps such as A citrate is a derivative of citric acid; that is, the salts, esters, and the polyatomic anion found in solutions and salts of citric acid. An example of the former, a salt is trisodium citrate; an ester is triethyl citrate. When citrate trianion is part of a salt, the formula of the citrate trianion is written as $C_6H_5O_3^{3-}$ or $C_3H_5O(COO)_3^{3-}$.

Linear algebra 20, §13 Axler (2015) p. Jain, Khalil Ahmad (1995). K. 1 Definitions and basic properties of inner product spaces Linear algebra is the branch of mathematics concerning linear equations such as.

Trapelia Wijayawardene, Nalin; Hyde, Kevin; Al-Ani, Laith Khalil Tawfeeq; Somayeh, Dolatabadi; Stadler, Marc; Haelewaters, Danny; et al. Retrieved 20 June 2025. Trapelia is a genus of lichen-forming fungi in the family Trapeliaceae. Most species reproduce through small, disc-shaped fruiting bodies that range from pale pink-brown to nearly black, and many can be identified by specific chemical compounds they produce. The genus was established by the French lichenologist Maurice Choisy in 1929 and contains more than 20 species found worldwide. These lichens form tight, crusty patches on rocks and bark that may appear smooth at first but often crack into small plates over time
