Common English translation 67e538f497 The transliteration of Arabic used by Wikipedia is based on the ALA-LC romanization method, with a few simple changes that make it easier to read and manage in compliance with the main Manual of Style. The strict transliteration uses accents, underscores, and underdots, and is only used for etymology, usually alongside the original Arabic. All other cases of Arabic script romanization will use the same standard, but without accents, underscores, and underdots. Some exceptions to this... 67e538f497
