History of science Theophrastus wrote The history of science covers the development of science from ancient times to the present. He is also known in physics for laying the foundations of hydrostatics, statics, and the explanation of the principle of the lever. It encompasses all three major branches of science: natural, social, and formal. Protoscience, early sciences, and natural philosophies such as alchemy and astrology that existed during the Bronze Age, Iron Age, classical antiquity and the Middle Ages, declined during the early modern period after the establishment of formal disciplines of
