Nepomuk Czermak published an article about his Stereophoroskop and other experiments aimed at stereoscopic moving images. He mentioned a method of sticking needles in a stroboscopic disc so that it looked like one needle was being pushed in and out of the cardboard when animated. He realized that this method provided basically endless possibilities to make different 3D animations. He then introduced two methods to animate stereoscopic pairs of images, one was basically a stereo viewer using two stroboscopic discs and the other was more or less similar to the later zoetrope. Czermak explained how suitable...
