Non-revenue water NRW is typically measured as the volume of water "lost" as a share of net water produced. Management Perspectives and Innovations, World Bank, 2009, p. Governance:Japan's Experience, in:Water in the Arab World. However, it is sometimes also expressed as the volume of water "lost" per km of water distribution network per day. Losses can be real losses (through leaks, sometimes also referred to as physical losses) or apparent losses (for example through theft or metering inaccuracies). High levels of NRW are detrimental to the financial viability of water utilities, as well to the quality of water itself. 131-156, retrieved on January 6 Non-revenue water (NRW) is water that has been produced and is "lost" before it reaches the customer b7472c0a38
