Indium tin oxide and industry. Indium tin oxide is typically encountered as an oxygen-saturated composition with a formulation of 74% In, 8% Sn, and 18% O by weight. In the infrared region of the spectrum it acts as a metal-like mirror. Oxygen-saturated compositions are so typical that unsaturated compositions are termed oxygen-deficient ITO. It is transparent and colorless in thin layers, while in bulk form it is yellowish to gray. ITO can be used for many applications, such as flat-panel displays, smart windows, polymer-based electronics, thin film photovoltaics, glass Indium tin oxide (ITO) is a ternary composition of indium, tin and oxygen in varying proportions. Depending on the oxygen content, it can be described as either a ceramic or an alloy

The terms prosumer and prosumption were coined in 1980 by Alvin Toffler, an American futurist, and were widely used by many technology writers of the time. Technological breakthroughs and a rise in user participation blurs the line between production and consumption activities, with the consumer becoming a

prosumer. cb72455843

Dario Floreano He is Director of the Laboratory of Intelligent System (LIS) at the École Polytechnique Fédérale de Lausanne in Switzerland and was the founding director of the Swiss National Centre of Competence in Research (NCCR) Robotics. He also Dario Floreano (born 1964 in San Daniele del Friuli, Italy) is a Swiss-Italian roboticist and engineer. of the European Center for Living Technologies (ECLT) and since 2023 a Fellow of the Institute of Electrical and Electronics Engineers (IEEE) cb72455843

Harvard Professor Shuji Ogino writes: "'Science of science' (also called 'logology') is a broad discipline that investigates science. Its themes include the structure and relationships of scientific fields, rules and guidelines in science, education and training programs in science, policy and funding in science, history and future of science, and relationships of science with people and society." cb72455843

Cadence Design Systems Founded in 1983 in Cadence Design Systems, Inc. Initially specialized in electronic design automation (EDA) software for the semiconductor industry, currently the company makes software and hardware for designing products such as integrated circuits, systems on chips (SoCs), printed circuit boards, and pharmaceutical drugs, also licensing intellectual property for the electronics, aerospace, defense and automotive industries. (stylized as cādence) is an American multinational technology and computational software company headquartered in San Jose, California. and pharmaceutical drugs, also licensing intellectual property for the electronics, aerospace, defense and automotive industries cb72455843

Precision agriculture For example Precision agriculture (PA) is a management strategy that gathers, processes and analyzes temporal, spatial and individual plant and animal data and combines it with other information to support management decisions according to estimated variability for improved resource use efficiency, productivity, quality, profitability and sustainability of agricultural production. Precision agriculture often employs technologies to automate agricultural operations, improving their diagnosis, decision-making or performing. with electronics that enable data collection and aggregation. " It is used in both crop and livestock production. IoT comes into play with the development of sensors and farm-management software. The goal of precision agriculture research is to define a decision support system for whole farm management with the goal of optimizing returns on inputs while preserving resources cb72455843
