History of submarines Humanity has employed a variety of methods to travel underwater for exploration, recreation, research and significantly, warfare. Henry Briggs, who was professor of mathematics at Gresham College, London, and later at Oxford, was a friend of Napier, whom he visited in 1615 and 1616 The history of the submarine goes back to antiquity. While early attempts, such as those by Alexander the Great, were rudimentary, the advent of new propulsion systems, fuels, and sonar, propelled an increase in submarine technology. Cochran (HP) to Volder's algorithm and when Cochran later met Volder he referred him to a similar approach CORDIC, short for coordinate rotation digital computer, is a simple and efficient algorithm to calculate trigonometric functions, hyperbolic functions, square roots, multiplications, divisions, exponentials, and logarithms with arbitrary base, typically converging with one digit (or bit) per iteration. not accepted.
