History of mathematics From 3000 BC the Mesopotamian states of Sumer, Akkad and Assyria, followed closely by Ancient Egypt and the Levantine state of Ebla began using arithmetic, algebra and geometry for taxation, commerce, trade, and in astronomy, to record time and formulate calendars.). Before the modern age and worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales. Calculus: Early Transcendentals (3 ed. Jones & Bartlett Learning. xxvii. ; Wright, Scott; Wright, Warren S. (2009). Zill, Dennis G. p. ISBN 978-0-7637-5995-7 The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past

History of logarithms The idea of logarithms was also used to construct the slide rule (invented around 1620–1630), which was ubiquitous in science and engineering until the 1970s. The Napierian logarithms were published first in 1614. E. exponential function or as the integral of $1/x$, Napier worked decades before calculus was invented, the exponential function was understood, or coordinate geometry The history of logarithms is the story of a correspondence (in modern terms, a group isomorphism) between multiplication on the positive real numbers and addition on real number line that was formalized in seventeenth century Europe and was widely used to simplify calculation until the advent of the digital computer. Tables of logarithms were published in many forms over four centuries. Hobson called it "one of the very greatest scientific discoveries that the world has seen. " Henry Briggs introduced common (base 10) logarithms, which were easier to use. A breakthrough generating. W
