Generative art An autonomous system in this context is generally one that is non-human and can independently determine features of an artwork that would otherwise require decisions made directly by the artist. In some cases the human creator may claim that the generative system represents their own artistic idea, and in others that the system takes on the role of the creator. generative art using systems of chemistry, biology, mechanics and robotics, smart materials, manual randomization, mathematics, data mapping, symmetry Generative art is post-conceptual art that has been created (in whole or in part) with the use of an autonomous system f702da25ef

Christian culture has influenced and assimilated much from the Middle Eastern, Greco-Roman, Byzantine, Western culture, Slavic and Caucasian culture. During the early Roman Empire, Christendom has been divided in the pre-existing Greek East and Latin West. Consequently, different versions of the Christian cultures arose with their own rites and practices, Christianity remains culturally diverse in its Western and Eastern branches. f702da25ef 2025 f702da25ef The MOSFET is the basic building block of most modern electronics, and the most frequently manufactured device in history, with an estimated total of 13 sextillion (1.3×10^{22}) MOSFETs manufactured between 1960 and 2018. It is the most common semiconductor device in digital and analog circuits, and the most common power device. It was the first truly compact transistor that... f702da25ef Jan f702da25ef Mar f702da25ef Purge server cache f702da25ef Non notable business executive, failing WP: BIO. Fair number of hits on google. About 400, but most seem to be social networking, mirrors of zoominfo, couple of bits in newspapers where is i... f702da25ef "Generative art" often refers to algorithmic art (algorithmically determined computer generated artwork) and synthetic media (general term for any algorithmically generated media), but artists can also make generative art using systems of chemistry, biology, mechanics and robotics, smart materials, manual randomization... f702da25ef Aug f702da25ef

Christian culture There are variations in the application of Christian beliefs in different cultures and traditions. rituals of purification relating to menstruation, childbirth, sexual relations, nocturnal emission, unusual bodily fluids, skin disease, death, and animal Christian culture generally includes all the cultural practices which have developed around the religion of Christianity f702da25ef

Steam turbine Its modern manifestation was invented by Sir Charles Parsons in 1884. Fabrication of a modern steam turbine involves advanced metalwork to form high-grade steel alloys into precision parts using technologies that first became available in the 20th century; continued advances in durability and efficiency of steam turbines remains central to the energy economics of the 21st century. The largest steam turbine ever built is the 1,770 MW Arabelle steam turbine built by Arabelle Solutions (previously GE Steam Power), two units of which. The largest steam turbine ever built is the 1,770 MW Arabelle steam turbine built by Arabelle Solutions (previously A steam turbine or steam turbine engine is a machine or heat engine that extracts thermal energy from pressurized steam and uses it to do mechanical work utilising a rotating output shaft. to the energy economics of the 21st century. It revolutionized marine propulsion and navigation to a significant extent

May f702da25ef Christianity played a prominent role in the development of Western civilization, in particular, the Catholic Church and Protestantism. Western culture... f702da25ef May f702da25ef Weather forecasts are made by collecting quantitative data about the current state of the atmosphere, land, and ocean and using meteorology to project how the atmosphere will change at a given place. Once calculated manually based mainly upon changes in barometric pressure, current weather conditions, and sky conditions or cloud cover, weather forecasting now relies on computer-based models that take many atmospheric factors into account. Human input is still required to pick the best possible model to base the forecast... f702da25ef Feb f702da25ef Apr f702da25ef Mar f702da25ef Feb f702da25ef Progesterone is a naturally occurring and bioidentical progestogen, or an agonist of the progesterone receptor, the biological target of progestogens like endogenous progesterone. Progesterone also has antimineralocorticoid and inhibitory neurosteroid activity, whereas it appears to have little or no glucocorticoid or antiandrogenic activity and has no androgenic activity. Because of its progestogenic activity, progesterone has functional antiestrogenic effects in certain tissues such as the uterus, cervix, and vagina. In addition, progesterone has antigonadotropic effects due to its progestogenic activity and can inhibit fertility and suppress sex hormone... f702da25ef

Weather forecasting Once calculated manually based mainly upon changes in barometric Weather forecasting or weather prediction is the application of science and technology to predict the conditions of the atmosphere for a given location and time. People have attempted to predict the weather informally for thousands of years and formally since the 19th century. and ocean and using meteorology to project how the atmosphere will change at a given place f702da25ef

List of MOSFET applications The MOSFET enables physicists to study electron The MOSFET (metal-oxide-semiconductor field-effect transistor) is a type of insulated-gate field-effect transistor (IGFET) that is fabricated by the controlled oxidation of a semiconductor, typically silicon. The voltage of the covered gate determines the electrical conductivity of the device; this ability to change conductivity with the amount of applied voltage can be used for amplifying or switching electronic signals. quantum mechanics, the MOSFET is the basis for two-dimensional electron gas (2DEG) and the quantum Hall effect f702da25ef
