Additional criteria A simulator that is useful for teaching purposes. Subtitles and closed captions General flowchart structure Shapes correspond to unit models Connectors correspond to instances of data. For MP, connectors are streams. Connecting to Excel Example of a datastructure Outro Simulation is therefore easy. ExcelFlow has its purposes A useful teaching tool. A useful prototyping tool. A useful commercialisation tool A useful method for allowing researchers to release their methods (primarily mathematical models and software models of mineral processing unit models) Distinct criteria How expensive? A design simulator or an operational simulator Is it user-friendly? Is it connected to a flowchart system? Is it extensible? Is the data structure appropriate? Can it be easily integrated with a relational database? Are the available models accurate?
