On one level, the book is an exploration of the mathematics of infinity through fiction, in much the same way the novel Flatland: A Romance of Many Dimensions explored the concept of multiple dimensions. More specifically, White Light uses an imaginary universe to elucidate the set theory concept of aleph numbers, which are more or less the idea that some infinities are bigger than others. 36ad7f7e42 Freischütz is a German compound word, consisting of frei ('free') and Schütz ('shooter' or 'rifleman'). There are several theories that try to explain why the word frei is used. One is that it has a military origin, perhaps from terms like Freikorps (independent 'free-corps' regiments), or the French franc-archer ('free-archer'). Another suggests a supernatural element, with frei having a sense of magic or enchantment, or that the bullet is destined by fate or the devil. It could even mean the acquisition of secret knowledge or skill, similarly to masters of other "free mathematical arts", such as stonemasons, painters, carvers, goldsmiths, and architects. 36ad7f7e42

In the fictional town of Bernho (Geneseo), he begins experimenting with lucid dreaming—aided by "fuzz weed" (marijuana)—hoping to gain insight into Cantor's continuum hypothesis. 36ad7f7e42 The supporting characters Hergé created for his series have been described as far more developed than the central character, each imbued with a strength of character and depth of personality that has been compared with that of the characters of Charles Dickens. Hergé was forced to focus on characterisation during the German occupation of Belgium during World War II to avoid depicting troublesome political situations. The public responded positively. Colourful main characters, villainous antagonists, and heroic supporting cast were introduced during the series. As a chess composer, he authored a number of chess problems, often with interesting themes. At his peak, Loyd was one of the best chess players in the US, and he was ranked 15th in the world, according to chessmetrics.com. Within the series' narrative, the Doctor is a centuries-old alien Time Lord from the planet Gallifrey who travels in time and space in the TARDIS, frequently with companions. At the end of life, the Doctor regenerates; as a result, the physical appearance and personality of the Doctor changes. Preceded in regeneration by the Third Doctor (Jon Pertwee), he is followed by the Fifth Doctor (Peter Davison). Following his death, his book Cyclopedia of 5000 Puzzles was published (1914) by his son, Samuel Loyd Jr. His son, named after his father, dropped the "Jr" from his name and started publishing reprints of his father's puzzles. == Plot ==
