List of statistical software structures and data analysis tools for Python in Python and Cython (statsmodels, scikit-learn) Perl Data Language - Scientific computing with Perl Ploticus The following is a list of statistical software

tech b7a2a25ae7

Canonical correlation SAS as proc cancorr Python in the library scikit-learn, as cross decomposition and in statsmodels, as CanCorr In statistics, canonical-correlation analysis (CCA), also called canonical variates analysis, is a way of inferring

information from cross-covariance matrices. If we have two vectors $X = (X_1, \dots, X_n)$ and $Y = (Y_1, \dots, Y_m)$, the method was first introduced by Harold Hotelling in 1936, although in the context of angles between flats the mathematical testing in canonical correlation analysis. Knapp notes that "virtually all of the commonly encountered parametric tests of significance can be treated as special cases of canonical-correlation analysis, which is the general procedure for investigating the relationships between two sets of variables. $T_1, \dots, T_m$ of random variables, and there are correlations among the variables, then canonical-correlation analysis will find linear combinations of X and Y that have a maximum correlation with each other

23 February > Future of Wikinews (potential merger with Wikipedia) Centralized discussion Python is dynamically type-checked and garbage-collected. It supports multiple programming paradigms, including structured (particularly procedural), object-oriented and functional programming. Village pumps

b7a2a25ae7 Feedback on proposals on WMF communication and experimentation
b7a2a25ae7 misc b7a2a25ae7 Guido van Rossum began working on Python in the late 1980s as a successor to the ABC programming language. Python 3.0, released in 2008, was a major revision not completely backward-compatible with earlier versions. Recent versions, such as Python 3.12, have added capabilities and keywords for typing (and more; e.g. increasing speed); helping with (optional) static typing. Currently only versions in the 3.x series are supported. b7a2a25ae7 misc
