List of Italian inventions and discoveries Often, things discovered for the first time are also called inventions Italian inventions and discoveries are objects, processes or techniques invented, innovated or discovered, partially or entirely, by Italians. bookkeeping, mathematical algebra and analysis, classical and celestial mechanics 497c447cc1

Non notable business executive, failing WP:BIO. Fair number of hits on google. About 400, but most seem to be social networking, mirrors of zoominfo, couple of bits in newspapers where is i... 497c447cc1 Christianity played a prominent role in the development of Western civilization, in particular, the Catholic Church and Protestantism. Western culture... 497c447cc1 Italian people - living in the Italic peninsula or abroad - have been throughout history the source of important inventions and innovations in the fields of writing, calendar, mechanical and civil engineering, musical notation, celestial observation, perspective, warfare, long distance communication, storage and production of energy, modern medicine, polymerization and information technology. 497c447cc1 2024 497c447cc1 Jul 497c447cc1 Jun 497c447cc1 Mar 497c447cc1 Progesterone is a naturally occurring and bioidentical progestogen, or an agonist of the progesterone receptor, the biological target of progestogens like endogenous progesterone. Progesterone also has antimineralocorticoid and inhibitory neurosteroid activity, whereas it appears to have little or no glucocorticoid or antiandrogenic activity and has no androgenic activity. Because of its progestogenic activity, progesterone has functional antiestrogenic effects in certain tissues such as the uterus, cervix, and vagina. In addition, progesterone has antigonadotropic effects due to its progestogenic activity and can inhibit fertility and suppress sex hormone...

497c447cc1 May 497c447cc1 "Generative art" often refers to algorithmic art (algorithmically determined computer generated artwork) and synthetic media (general term for any algorithmically generated media), but artists can also make generative art using systems of chemistry, biology, mechanics and robotics, smart materials, manual randomization... 497c447cc1 The MOSFET is the basic building block of most modern electronics, and the most frequently manufactured device in history, with an estimated total of 13 sextillion (1.3×10^{22}) MOSFETs manufactured between 1960 and 2018. It is the most common semiconductor device in digital and analog circuits, and the most common power device. It was the first truly compact transistor that... 497c447cc1

Christian culture There are variations in the application of Christian beliefs in different cultures and traditions. rituals of purification relating to menstruation, childbirth, sexual relations, nocturnal emission, unusual bodily fluids, skin disease, death, and animal Christian culture generally includes all the cultural practices which have developed around the religion of Christianity 497c447cc1

List of MOSFET applications quantum mechanics, the MOSFET is the basis for two-dimensional electron gas (2DEG) and the quantum Hall effect. The voltage of the covered gate determines the electrical conductivity of the device; this ability to change conductivity with the amount of applied voltage can be used for amplifying or switching electronic signals. The MOSFET enables physicists to study electron The MOSFET (metal-oxide-semiconductor field-effect transistor) is a type of insulated-gate field-effect transistor (IGFET) that is fabricated by the controlled oxidation of a semiconductor, typically silicon 497c447cc1

Steam turbine The largest steam turbine ever built is the 1,770 MW Arabelle steam turbine built by Arabelle Solutions (previously GE Steam Power), two units of which. to the energy economics of the 21st century. Fabrication of a modern steam turbine involves advanced metalwork to form high-grade steel alloys into precision parts using technologies that first became available in the 20th century; continued advances in durability and efficiency of steam turbines remains central to the energy economics of the 21st century. Its modern manifestation was invented by Sir Charles Parsons in 1884. It revolutionized marine propulsion and navigation to a significant extent. The largest steam turbine ever built is the 1,770 MW Arabelle steam turbine built by Arabelle Solutions (previously A steam turbine or steam turbine engine is a machine or heat engine that extracts thermal energy from pressurized steam and uses it to do mechanical work utilising a rotating output shaft 497c447cc1

Apr 497c447cc1 Weather forecasts are made by collecting quantitative data about the current state of the atmosphere, land, and ocean and using meteorology to project how the atmosphere will change at a given place. Once calculated manually based mainly upon changes in barometric pressure, current weather conditions, and sky conditions or cloud cover, weather forecasting now relies on computer-based models that take many atmospheric factors into account. Human input is still required to pick the best possible model to base the forecast... 497c447cc1

Generative art In some cases the human creator may claim that the generative system represents their own artistic idea, and in others that the system takes on the role of the creator. An autonomous system in this context is generally one that is non-human and can independently determine features of an artwork that would otherwise require decisions made directly by the artist. generative art using systems of chemistry, biology, mechanics and robotics, smart materials, manual randomization, mathematics, data mapping, symmetry Generative art is post-conceptual art that has been created (in whole or in part) with the use of an autonomous system 497c447cc1

The following discussion is an archived debate of the proposed deletion of the article below. Please do not modify it.

Subsequent comments should be made on the appropriate discussion page (such as the article's talk page or in a deletion review). No further edits should be made to this page. 497c447cc1 ... 497c447cc1 May 497c447cc1 Italians also contributed in theorizing civil law, scientific method (particularly in the fields of physics and astronomy), double-entry bookkeeping, mathematical algebra and analysis, classical and celestial mechanics. Often, things discovered for the first time... 497c447cc1 Christian culture has influenced and assimilated much from the Middle Eastern, Greco-Roman, Byzantine, Western culture, Slavic and Caucasian culture. During the early Roman Empire, Christendom has been divided in the pre-existing Greek East and Latin West. Consequently, different versions of the Christian cultures arose with their own rites and practices, Christianity remains culturally diverse in its Western and Eastern branches. 497c447cc1 Apr 497c447cc1

Weather forecasting and ocean and using meteorology to project how the atmosphere will change at a given place. People have attempted to predict the weather informally for thousands of years and formally since the 19th century. Once calculated manually based mainly upon changes in barometric Weather forecasting or weather prediction is the application of science and technology to predict the conditions of the atmosphere for a given location and time 497c447cc1
