

Pavement Surface Evaluation And Rating Study Paser

Pavement Surface Evaluation and Rating Information Center. When assessed correctly, PASER ratings provide a basis for comparing the quality of roadway segments. PASER uses visual inspection to evaluate pavement surface conditions. PASER uses visual inspection to evaluate pavement surface conditions. When assessed correctly, PASER ratings provide a basis for comparing The PASER scale is a 1-10 rating system for road pavement condition developed by the University of Wisconsin-Madison Transportation Information Center. The advantage to

this method is that roads may be assessed quickly, possibly even by "windshield survey. The PASER assessment method does not require measurements of individual distresses, and thus PASER ratings cannot be disaggregated into measurements of specific distress types. " A primary disadvantage is that because PASER ratings cannot be disaggregated into component distress data, the metric cannot be used in mechanistic-empirical transportation asset management programs 7a4fde99d4
