Founded in the tradition of Bishop Daniel Delany in 1953, the college formerly catered for students in Years 5 to 12, however the primary section was merged into the local parish primary school and closed in 2006. Today the school enrolls approximately 1150 high school aged students from the parishes of Villawood, Fairfield, Cabramatta and Smithfield. 85% of the student population are from non-English speaking backgrounds. The administration of the school is overseen by Sydney Catholic Schools. The DiMAGE 5 was announced 11 February 2001. For nearly three decades, a CLI was the most common interface for software, but today a graphical user interface (GUI) is more common. Nonetheless, many programs such as operating system and software development utilities still provide CLI.

Gnus blurs the distinction between news and e-mail, treating them both as "articles" that come from different sources. News articles are kept separate by group, and e-mail can be split into arbitrary groups, similar to folders in other mail readers. In addition, Gnus is able to use a number of web-based sources as inputs for its groups. The camera uses a 2048 x 1536 pixel sensor and has a fixed 7x optical zoom lens. A CLI is made possible...

The Dimage 5 is the middle-range model, with the same sophisticated controls as Dimage 7, but a smaller 3.34-megapixel CCD and an expanded 35-250mm equivalent lens (due to the smaller CCD).

Command-line interface of commands. Command-line interfaces emerged in the mid-1960s, on computer terminals, as an interactive and more user-friendly alternative to the non-interactive mode available with punched cards. A command-line system may require paper or online manuals for the user's reference, although often a help option provides a concise review. A command-line interface (CLI), sometimes called a command-line shell, is a means of interacting with software via commands – each formatted as a line of text.

[de] (in Czech). 2001 (5) (Czech ed The Kamenický encoding (Czech: kódování Kamenických), named for the brothers Jiří and Marian Kamenický, was a code page for personal computers running DOS, very popular in Czechoslovakia (since 1993, the Czech Republic and Slovakia) around 1985–1995. Another name for this encoding is KEYBCS2, the name of the terminate-and-stay-resident utility which implemented the matching keyboard driver.

It was based on the code page 437 encoding (with accented characters for Western-European languages) where most of the characters from code points 128 to 173 were replaced by Czech and Slovak characters chosen so that the glyphs of the replacement characters resembled those of the original as closely as possible, e. g. č in the place of ç. This ensured that text in the Kamenický...

Multi-user dungeon Players can read or view descriptions of rooms, objects, other players, and non-player characters, and perform actions in the virtual world that are typically also described. MUDs combine elements of role-playing games, hack and slash, player versus player, interactive fiction, and online chat. Players typically interact with each other and the world by typing commands that resemble a natural language, as well as using a character typically called an avatar. A multi-user dungeon (MUD, /mʌd/), also known as a multi-user dimension or multi-user domain, is a multiplayer real-time virtual world, usually text-based.
