Each year, millions of people die of preventable causes. A 2004 study showed that about half of all deaths in the United States in 2000 were due to preventable behaviors and exposures. Leading causes included cardiovascular disease, chronic respiratory disease, unintentional injuries, diabetes, and certain infectious diseases. This same study estimates that 400... f2130ed376

Preventive healthcare and lifestyle medicine, and are current, non-clinical life choices such as eating nutritious meals and exercising often, that prevent lifestyle-related Preventive healthcare, or prophylaxis, is the application of healthcare measures to prevent

diseases. Disease prevention relies on anticipatory actions that can be categorized as primal, primary, secondary, and tertiary prevention. Disease and disability are affected by environmental factors, genetic predisposition, disease agents, and lifestyle choices, and are dynamic processes that begin before individuals realize they are affected f2130ed376

Sleep medicine The rapidly evolving field has become a recognized medical subspecialty, with somnologists practicing in various countries. Sleep medicine is a medical specialty or subspecialty devoted to the diagnosis and therapy of sleep disturbances and disorders. From the middle of the 20th century, research in the field of somnology has provided increasing knowledge of, and answered many questions about, sleep-wake functioning. The sleep physicians who treat patients (known as somnologists), may dually serve as sleep researchers in certain countries. Dental sleep medicine also qualifies for board certification in some countries. Properly organized, minimum 12-month, postgraduate training programs are

still being defined in the United States. From the middle of the Sleep medicine is a medical specialty or subspecialty devoted to the diagnosis and therapy of sleep disturbances and disorders
