Purge server cache f751a7ce40 A good article (GA) is a Wikipedia article that meets a
core set of editorial standards, the good article criteria, passing through the good
article nomination process successfully. They are well-written, contain factually
accurate and verifiable information, are broad in coverage, neutral in point of view,
stable, and illustrated, where possible, by relevant images with suitable copyright
licenses. Good articles do not have to be as comprehensive as featured articles (FA),
but they should not omit any major facets: a comparison of the criteria for good and
featured articles describes further differences. f751a7ce40 Updating the message box

List of unsolved problems in mathematics Hilbert's sixteenth problem: what are
the possible Many mathematical problems have been stated but not yet solved.
Hilbert's fifteenth problem: put Schubert calculus on a rigorous foundation.
Prizes are often awarded for the solution to a long-standing problem, and some lists of
unsolved problems, such as the Millennium Prize Problems, receive considerable
attention. These problems come from many areas of mathematics, such as theoretical
physics, computer science, algebra, analysis, combinatorics, algebraic, differential,
discrete and Euclidean geometries, graph theory, group theory, model theory, number

theory, set theory, Ramsey theory, dynamical systems, and partial differential equations. Some problems belong to more than one discipline and are studied using techniques from different areas. entries all equal to 1 or -1

furthe... Originally called infinitesimal calculus or "the calculus of
infinitesimals", it has two major branches, differential calculus and integral calculus.
The former concerns instantaneous rates of change, and the slopes of curves, while the
latter concerns accumulation of quantities, and areas under or between curves. These
two branches are related to each other by the fundamental theorem of calculus. They
make use of the fundamental notions of convergence of infinite sequences and infinite
series to a well-defined limit. It is the "mathematical backbone" for dealing with
problems where variables change with time or another... Out of the

Of the over seven million articles in the English Wikipedia there are some articles that Wikipedians have identified as being somewhat unusual. If you wish to add an article to this list, the article in question should preferably meet one or more of these criteria:. We should take special care to meet the highest standards of an encyclopedia with these articles lest they make Wikipedia appear idiosyncratic.

Evel Knievel A biker known for his numerous stunts, and accidents during said stunts. These articles are verifiable, valuable contributions to the encyclopedia, but are a bit odd, whimsical, or something one would not expect to find in Encyclopædia Britannica.
