Following the end of the Roman Empire in Western Europe, Sardinia passed through periods of successive control by the Vandals, Byzantines, local Judicates, the Kingdom of Aragon, the Savoyard state, and finally Italy. These regimes varied in their usage of Sardinian as against other languages. For example, under the Judicates, Sardinian was used in administrative documents. Under Aragonese control, Catalan and Castilian became the island's prestige... a8406a352a

Little is known about the life of Guccio di Mannaia, and very few works are attributed to him with certainty. He came from a family of Sienese goldsmiths, with his brother (Pino) as well as his three sons (Montigiano, Mannaia, and Jacopo) working in the same trade. He was influenced by Pace di Valentino who was the first Sienese

goldsmith working for the papal court (under popes Nicholas III, Martin IV, Honorius IV, and Boniface VIII). In addition, he seems to have been familiar with northern European artworks, such as the Westminster retable in England and the miniatures in illuminated manuscripts of the Parisian Master Honoré, to which the human figures in his work are often compared. It is certain that he was actively working until 1322 though he was dead by 1329. a8406a352a

Varieties of Arabic Likewise, many of the features that characterize (or distinguish) the various modern variants can be attributed to the original settler dialects as well as local native languages and dialects. Many aspects of the variability attested to in these modern variants can be found in the ancient Arabic dialects in the peninsula.

Among the most famous buildings he designed are the churches of San Sebastiano (1460) and Sant'Andrea (1472), both in Mantua. a8406a352a Michel Henry was born in Haiphong, French Indochina (now Vietnam), and he lived in French Indochina until he was seven years old. Following the death of his father, who was an officer in the French Navy, he and his mother settled in metropolitan France. While studying in Paris, he discovered a true passion for philosophy, which he decided to make his profession—he enrolled at the École Normale Supérieure, at the time part of the University of Paris. From June 1943, he was fully engaged with the French Resistance, joining the maquis of the Haut Jura under the code name of Kant. He often had to come down from the mountains in order to accomplish missions in Nazi-occupied Lyon, an experience of clandestinity that deeply marked his philosophy. a8406a352a Pertusi was born in Piacenza from Ugo and Giovanna Pertusi (née Bossoli). As was the custom of the time, the name of one of his father's estates, "Duperron", was added to his name to distinguish him from his brothers. Anquetil-Duperron initially distinguished himself in the study of theology at Paris and Utrecht with the intention of becoming a priest like his elder brother Louis-Pierre Anquetil. The distinctive character of the Sardinian language among the Romance languages has long been known among linguists. Many Romance linguists consider it, together with Italian, as the language that is the closest to Latin among all of Latin's descendants. However, it has also incorporated elements of Pre-Latin (mostly Paleo-Sardinian and, to a much lesser degree, Punic) substratum, as well as a Byzantine Greek, Catalan, Spanish, French, and Italian superstratum. These elements originate in the political history of Sardinia, whose indigenous society experienced competition and, at times, conflict with a series of colonizing newcomers. a8406a352a She was a visiting professor at the University of Pennsylvania, the University of Buenos Aires and the Hebrew University of Jerusalem. a8406a352a == Biography == a8406a352a == Biography == a8406a352a In his youth he was drawn to the Manichaean faith, and later to the Hellenistic philosophy of Neoplatonism.
