Outboard motor Unlike inboard motors, outboard motors can be easily removed for storage or repairs. They are the most common motorised method of propelling small watercraft. The skeg also acts as a rudder when the engine is not running. which raise or lower the engine is malfunctioning, every outboard motor is equipped with a manual piston release which will allow the operator to drop the An outboard motor is a propulsion system for boats, consisting of a self-contained unit that includes engine, gearbox and propeller or jet drive, designed to be affixed to the outside of the transom. As well as
