Communicating systems use well-defined formats for exchanging various messages. Each message has an exact meaning intended to elicit a response from a range of possible responses predetermined for that particular situation. The specified behavior is typically independent of how it is to be implemented. Communication protocols have to be agreed upon by the parties involved. To reach an agreement, a protocol may be developed...

53cac5452f

Communication protocol The protocol defines the rules, syntax, semantics, and synchronization of communication and possible error recovery methods. Protocols may be implemented by hardware, software, or a combination of both. Computer Networking: A Top-Down Approach. Pearson. "Layering considered harmful".

IEEE Network: 20-24. Kurose, James; Ross, Keith (2005).
Lascano, A communication protocol is a system of rules
that allows two or more entities of a communications
system to transmit information via any variation of a
physical quantity. 1992) 53cac5452f
