Button began karting at the age of eight and achieved early success, before progressing to car racing in the British Formula Ford Championship and the British Formula 3 Championship. He first drove in F1 with Williams for the 2000 season. The following year he switched to Benetton, which at the start of the 2002 season became the Renault team, and then for the 2003 season he moved to BAR. He finished third in the 2004 World Drivers' Championship, before falling to ninth in the 2005 championship. BAR was... 2cf574729f

Can-Am Spyder The manufacturer refers to it as a "roadster," but in technical terms, it is more of what has been traditionally called a trike. The vehicle has a single rear drive wheel and two wheels in front for steering, similar in layout to a modern snowmobile. ground-to-seat height, and a smaller 600 or 900 cc engine. There are four trim packages available for the Ryker: the 600, the 900, the 900 Sport and the 900 The Can-Am Spyder ("Spyder") is a three-wheeled motorcycle manufactured by Can-Am motorcycles, a division of Bombardier Recreational Products. The Spyder uses an ATV-like chassis 2cf574729f

Power-to-weight ratio rotax. "Powertrains Detail". com. Power-to-weight ratio is a measurement of actual performance of

any engine or power source. original on 2013-08-01. Power-to-weight is often quoted by manufacturers at the peak value, but the actual value may vary in use and variations will affect performance. Retrieved 2021-05-26. It is also used as a measurement of performance of a vehicle as a whole, with the engine's power output being divided by the weight (or mass) of the vehicle, to give a metric that is independent of the vehicle's size. www. Retrieved 2010-01-12. Archived from the original on 2021-05-15. "Sea-Doo Power-to-weight ratio (PWR, also called specific power, or power-to-mass ratio) is a calculation commonly applied to engines and mobile power sources to enable the comparison of one unit or design to another 2cf574729f

History of BMW motorcycles a Rotax parallel-twin engine. Production of motorcycles with flat-twin engines continues to this day, however BMW has also produced many models with other types of engines. BMW's own motorcycles—sold under the BMW Motorrad brand—began in 1923 with the BMW R 32, which was powered by a flat-twin engine (also called a "boxer-twin" engine). The BMW F 650 GS and BMW F800 GS dual-sport bikes were added to the range in 2008, both using the same 798 cc engine, despite BMW's motorcycle history began in 1921 when the company commenced manufacturing engines for other companies 2cf574729f

The Russian aircraft industry offers a portfolio of internationally competitive military aircraft such as MiG-29 and Su-27, while new projects such as the Sukhoi Superjet 100 are hoped... 2cf574729f

Jawa Moto In the past, especially in the 1950s, JAWA was one of the top motorcycle manufacturers and exported its 350 model to over 120 countries. 250, 125, and 50 cc motorcycles and a large bike with a 650 cc Rotax engine (this engine can be also found in BMW F650 series). The name JAWA was established by concatenating the first letters of Janeček and Wanderer. It appeared in typical black and red coloring from the US to New Zealand. The best known model was the 350 Pérák, and in the 1970s the 350 Californian. After 1990 a significant loss of production occurred. Production of motorcycles JAWA (Czech pronunciation: [java]) is a motorcycle and moped manufacturer founded in Prague, Czechoslovakia, in 1929 by František Janeček, who bought the motorcycle division of Wanderer. A successor company was formed in 1997 in Týnec nad Sázavou, continuing the name as JAWA Moto 2cf574729f

Aircraft industry of Russia models of the aircraft used Austrian origin Rotax 912 engines. A consolidation programme launched in 2005 led to the creation of the United Aircraft Corporation holding company, which includes most of the industry's key companies. The dissolution of the Soviet Union led to a deep crisis for the industry, especially for the civilian aircraft segment. The situation started improving during the middle of the first decade of the 2000s due to growth in air transportation and increasing demand. After 2022, reviving the passenger aircraft industry in Russia became the main goal. The further Aircraft manufacturing is an important industrial sector in Russia, employing around 355,300 people. These were later replaced with Zongshen C-100 engines of a similar specification
