Dendrochronology Dendrochronology derives from the Ancient Greek dendron (δένδρον), meaning "tree", khronos (χρόνος), meaning "time", and -logia (-λογία), "the study of". As well as dating them, this can give data for dendroclimatology, the study of climate and atmospheric conditions during different periods in history from the wood of old trees. Dendrochronology (or tree-ring dating) is the scientific method of dating tree rings (also called growth rings) to the exact year they were formed in a tree. On the Origin of Species It was published on 24 November 1859. and it has now become the unifying concept of the life sciences. The book presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin's theory of evolution is based on key facts and the inferences drawn from them On the Origin of Species (or, more completely, On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life) is a work of scientific literature by Charles Darwin that is considered to be the foundation of evolutionary biology. Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection, although Lamarckism was also included as a mechanism of lesser importance. Darwin included evidence that he had collected on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence bbf5f9f2a
