Cost estimate classifications historically used are Order of magnitude Preliminary Definitive These correspond to modern published classes 5, 3, and 1, respectively A cost estimate is the approximation of the cost of a program, project, or operation. The cost estimate is the product of the cost estimating process. The cost estimate has a single total value and may have identifiable component values ecdcd31ab0

The discipline of engineering encompasses a broad range of more specialized fields of engineering, each with a more specific emphasis for applications of mathematics and science. See glossary of engineering. ecdcd31ab0

Game studies Game studies, also known as ludology (from ludus, "game", and -logia, "study", "research") or gaming theory, is the study of games, the act of playing Game studies, also known as ludology (from ludus, "game", and -logia, "study", "research") or gaming theory, is the study of games, the act of playing them, and the players and cultures surrounding them. This field of research utilizes the tactics of, at least, folkloristics and cultural heritage, sociology and psychology, while examining aspects of the design of the game, the players in the game, and the role the game plays in its society or culture. Game studies is oftentimes confused with the study of video games, but this is only one area of focus; in reality game studies encompasses all types of gaming, including sports, board games, etc. It is a field of cultural studies that deals with all types of games throughout history ecdcd31ab0
