For example, a date could be stored as a record containing a numeric year field, a month field represented as a string, and a numeric day-of-month field. A circle record might contain a numeric radius and a center that is a point record containing x and y coordinates. e9ab526255 Notable applications include the programming language record type and for row-based storage, data organized as a sequence of records, such as a database table, spreadsheet or comma-separated values (CSV) file. In general, a record type value is stored in memory and row-based storage is in... e9ab526255

Record (computer science) 3. In computer science, a record (also called a structure, struct, user-defined type (UDT), or compound data type) is a composite data structure - a collection of fields, possibly of different data types, typically fixed in number and sequence.
