History of mathematics From 3000 BC the Mesopotamian states of Sumer, Akkad and Assyria, followed closely by Ancient Egypt and the Levantine state of Ebla began using arithmetic, algebra and geometry for taxation, commerce, trade, and in astronomy, to record time and formulate calendars. development of mathematics and of accounting were intertwined. Before the modern age and worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales. While there is no direct relationship between algebra and accounting, the teaching of the subjects The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past ce156a3e85
