The etymology of "first-class cricket" is unknown, but the term was used loosely before it acquired official status in 1895, following a meeting of leading English clubs. At a meeting of the Imperial Cricket Conference (ICC) in 1947, it was formally defined on a global basis. A significant omission of the ICC ruling was any attempt to define... 87ef3bfe7c In science education, he was best known for the CHEM STUDY project, a national effort to improve high-school chemistry teaching. THCP is structurally similar to Δ^9 -THC, the main active component of cannabis, but with the pentyl side chain extended to heptyl. Since it has a longer side chain, its cannabinoid effects are "far higher than Δ^9 -THC itself." Tetrahydrocannabiphorol has a reported binding affinity of 1.2 nM at CB1, approximately 33 times that of Δ^9 -THC (40 nM at CB1), however this does not mean it's 33x stronger per milligram. 87ef3bfe7c He is the recipient of many awards, including the National Medal of Science (2006). 87ef3bfe7c
