Hybrid electric vehicle batteries and a smaller, weaker motor/generator, which allows manufacturers to reduce cost and weight. There is a variety of HEV types and the degree to which each functions as an electric vehicle (EV) also varies. Honda's early hybrids including the first generation A hybrid electric vehicle (HEV) is a type of hybrid vehicle that couples a conventional internal combustion engine (ICE) with one or more electric engines into a combined propulsion system. The presence of the electric powertrain, which has inherently better energy conversion efficiency, is intended to achieve either better fuel economy or better acceleration performance than a conventional vehicle. The most common form of HEV is hybrid electric passenger cars, although hybrid electric trucks (pickups, tow trucks and tractors), buses, motorboats, and aircraft also exist e2ec5fbfe8
