Agriculture Combining agricultural production with general theories of marketing and business as a discipline of study began Agriculture is the practice of cultivating the soil, planting, raising, and harvesting both food and non-food crops, as well as livestock production. Broader definitions also include forestry and aquaculture. Agriculture was a key factor in the rise of sedentary human civilization, whereby farming of domesticated plants and animals created food surpluses that enabled people to live in the cities. While humans started gathering grains at least 105,000 years ago, nascent farmers only began planting them around 11,500 years ago. In the 20th century, industrial agriculture based on large-scale monocultures came to dominate agricultural output. Sheep, goats, pigs, and cattle were domesticated around

10,000 years ago. of [agricultural] goods and services". Plants were independently cultivated in at least 11 regions of the world

Activities of food scientists include the development of new food products, design of processes to produce these foods, choice of packaging materials, shelf-life studies, sensory evaluation of products using survey panels or potential consumers, as well as microbiological...
