HyperCourseware , lectures, discussions, question and answer, etc. " The goal was to rehost electronically all of the things that go into education: the materials, (e. g. g. g. , the blackboard, notebooks, calculators, etc.) , lectures, discussions, question and answer, etc.), the tools (e. The objective embraced HyperCourseware is a prototype

electronic educational environment developed in 1990 by Kent Norman at the University of Maryland, College Park, to be used in an electronic classroom called the "Teaching Theater. , textbooks, maps and charts, lesson plans, etc. g.), and the processes (e.), and the processes (e.). , the blackboard, notebooks, calculators, etc. tools (e. g c124f6241f

Audience response Additionally, many college professors use ARS systems to take attendance or grade answers in large Audience Response is a type of interaction associated with the use of Audience Response systems to facilitate interaction between a presenter and their audience. tabulation of answers for large groups than manual methods c124f6241f

The information covered by Google's Knowledge Graph grew quickly after launch, tripling its data size within seven months (covering 570 million entities and 18 billion facts). By mid-2016, Google reported that it held 70 billion facts and answered "roughly one-third" of the 100 billion monthly searches they handled. By May 2020, this had grown to 500 billion facts on 5 billion entities. c124f6241f The objective embraced by HyperCourseware has been quite broad: to provide an integrated and seamless hypermedia infrastructure to support the full range of classroom activities (Norman & Carter, 1992). c124f6241f At the global level, HyperCourseware was organized around educational tools, materials, and... c124f6241f

Google Answers Google Answers was an online knowledge market offered by Google, active from April 2002 until December 2006. Google Answers's predecessor was Google Questions Google Answers was an online knowledge market offered by Google, active from April 2002 until December 2006 c124f6241f

Systems for co-located audiences combine wireless hardware with presentation software. Systems for remote audiences may use telephones or web polls for audiences watching through television or the internet. Various names are used for this technology, including real-time response, the worm, dial testing, and Audience Response meters. In educational settings, such systems are often called "student response systems" or "personal response systems". The hand-held remote control that students use to convey their responses to questions is often called a "clicker". c124f6241f There is no official documentation of how the Google Knowledge Graph is implemented. c124f6241f

Dialogue journal It can be used to promote second language learning (English and other languages) and learning in all areas. daily throughout the school year with each of her students in a dialogue journal (a small notebook) to promote personalized, ongoing, supportive communication A dialogue journal is an ongoing written interaction between two people to exchange experiences, ideas, knowledge or reflections. sustained written interaction between students and teachers at all education levels c124f6241f

Google Notebook The information was saved to an online "notebook" with sharing and collaboration features. Notebooks could be made "public", or visible to others, and also could be used to collaborate with a list of users (either publicly or privately). Google Notebook was a free online application offered by Google that allowed users to save and organize clips of information while conducting research Google Notebook was a free online application offered by Google that allowed users to save and organize clips of information while conducting research online. The browser-based tool permitted a user to write notes, clip text and images, and save links from pages during a browser session c124f6241f

Dialogue journals are used in many schools as a form of communication between teachers and students to improve the life that they share in the classroom by exchanging ideas and shared topics of interest, promoting writing in a non-evaluative context, and promoting student engagement with learning. They are also used between teachers and teacher trainers to provide professional development opportunities and improve teaching.... c124f6241f

Stanford Mobile Inquiry-based Learning Environment SMILE is valuable for aiding the learning process in remote, poverty. Teachers play more of the role of a "coach," or "facilitator". The software generates transparent real-time learning analytics so teachers can better understand each student's learning journey, and students acquire deeper insight regarding their own interests and skills. Verifying that distractors are not feasible answers to the question Stanford Mobile Inquiry-based Learning Environment (SMILE) is a mobile learning management software and pedagogical model that introduces an innovative approach to students' education. Instead of a passive, one-way lecture, SMILE engages students in an active learning process by encouraging them to ask, share, answer and evaluate their own questions. It is designed to push higher-order learning skills such as applying, analyzing, evaluating, and creating. because it leads students to do thorough research to find the right answer and distractors c124f6241f

Knowledge Graph (Google) is used to answer direct spoken questions in Google Assistant and Google Home voice queries. It has been criticized for providing answers with neither The Knowledge Graph is a knowledge base from which Google serves relevant information in an infobox beside its search results. The data is generated automatically from a variety of sources, covering places, people, businesses, and more. This allows the user to see the answer in a glance, as an instant answer c124f6241f
