Distribution center Automated Storage and Retrieval Systems (ASRS). Distribution centers are usually thought of as being demand driven. Pallets are stored - A distribution center for a set of products is a warehouse or other specialized building, often with refrigeration or air conditioning, which is stocked with products (goods) to be redistributed to retailers, to wholesalers, or directly to consumers. For example, a "retail distribution center" normally distributes goods to retail stores, an "order fulfillment. The name by which the distribution center is known is commonly based on the purpose of the operation. A distribution center can also be called a warehouse, a DC, a fulfillment center, a cross-dock facility, a bulk break center, and a package handling center. handle pallets see forklift truck, pallet jack, pallet inverter, and unit load. A distribution center is a principal part, the order processing element, of the entire order fulfillment process 19d344f535
