

Practical Guide To Latex Technology

Condom There are both external condoms, also called male condoms, and internal (female) condoms. External condoms are typically made from latex and A condom is a sheath-shaped barrier device used during sexual intercourse to reduce the probability of pregnancy or a sexually transmitted infection (STI). skin-to-skin contact, exposure to fluids, and blocks semen from entering the body of a sexual partner 14d4ca71ff

Sealant Sealants may be weak or strong, flexible or rigid, permanent or temporary. construction sealant is sometimes synonymous with caulk (especially if acrylic latex or polyurethane based) and also serve the purposes of blocking dust, sound Sealant is a substance used to block the passage of fluids through openings in materials, a type of mechanical seal. Sealants are not adhesives but some have adhesive qualities and are called adhesive-sealants or structural sealants. In building construction sealant is sometimes synonymous with caulk (especially if acrylic latex or polyurethane based) and also serve the purposes of blocking dust, sound and heat transmission 14d4ca71ff

The words are shortened forms of the English and Latin words for "thousand" (mille in Latin). In international engineering contexts, confusion can arise because mil is a formal unit name in North America but mil or mill is also a common colloquial clipped form of millimetre. The units are considerably different: a millimetre is approximately 39 mils. 14d4ca71ff Common allergens include pollen and certain foods. Metals and other substances may also cause such problems. Food, insect stings, and medications are common causes of... 14d4ca71ff The external condom is rolled onto an erect penis before intercourse and works by forming a physical barrier which limits skin-to-skin contact, exposure to fluids, and blocks semen from entering the body of a sexual partner. External condoms are typically made from latex and, less commonly, from polyurethane, polyisoprene, or lamb intestine. External condoms have the advantages of ease of use, ease of access, and few side effects. Individuals with latex allergy should use condoms made from a material other than latex, such as polyurethane. Internal... 14d4ca71ff

Skin-tight garment For individuals with a rubber or A skin-tight garment is a garment that is held to the skin usually by elastic tension using some type of stretch fabric. fetishism; certain types of fetishized clothing, such as latex and spandex suits, are designed to be extremely skintight. A wide variety of clothing may be made to be skin-tight, and it is common for clothing to be skin-tight for some uses, such as in stockings, bodystockings, swimsuits and women's bras. Commercial stretch fabrics ('elastomerics') such as spandex or elastane (widely branded as 'Lycra') came onto the market in 1962, and revolutionized many areas of the clothing industry 14d4ca71ff

Prosthetic makeup to wear in The Wolfman, though application of the hair for the titular character could take up to 16 hours. Foam latex was first used by Prosthetic makeup also known as special makeup effects or FX prosthesis, is the process of using prosthetic sculpting, molding and casting techniques to create advanced cosmetic effects. Lon Chaney Jr. Prosthetics are used on stage and screen to create fantasy creatures, simulated injuries, or likenesses of other people 14d4ca71ff

Animatronics Latex: White latex is commonly used as a general material because it An animatronic is a puppet controlled electronically to move in a fluent way. all-metal bunyip animatronic in Australia uses water to actuate the creature's mouth. Animatronics are the modern adaptation of the automaton and are often used for the portrayal of characters in films, video games, and theme park attractions 14d4ca71ff

Creature suit Foam latex can also be used to create suits, and masks may sometimes Creature suits are realistic costumes used to disguise a performer as an animal, monster, or other being. They are used in film, television, or as costumed characters in live events. In contrast with prosthetic makeup, which is applied to an actor's skin, the wearer is not normally visible outside their movements controlling the costume, although in some cases, part of the wearer's body is still visible (such as in the case of mermaids or other half-human monsters). foam padding covered by painted liquid latex (to simulate bare skin) or fake fur. Unlike mascots, they are often made with a high degree of realism 14d4ca71ff

The word "gutta-percha" comes from the plant's name in Malay: getah translates as 'sticky gum' and pertja (perca) is the name of a less-sought-after gutta tree. The western term therefore is likely a derivative amalgamation of the original native names. 14d4ca71ff Animatronics are a multidisciplinary field integrating puppetry, anatomy and mechatronics. Animatronic figures can be implemented with both computer and human control, including teleoperation. Motion actuators are often used to imitate muscle movements and create realistic motions. Figures are usually encased in body shells and flexible skins made of hard or soft plastic materials and finished with colors, hair, feathers and other components to make them more lifelike. Animatronics stem from a long tradition of mechanical automata powered by hydraulics, pneumatics... 14d4ca71ff

Dry suit In hazmat configurations, however, all of these are covered as well. To reduce the contact with latex seals in divers with a latex allergy, a soft elastomer band called a 'Bio-seal' can be worn under the latex contact A dry suit or drysuit provides the wearer with environmental protection by way of thermal insulation and exclusion of water, and is worn by divers, boaters, water sports enthusiasts, and others who work or play in or near cold or contaminated water. water. A dry suit normally protects the whole body except the head, hands, and possibly the feet 14d4ca71ff

Thousandth of an inch Equal to 1/1000 of an inch, a thousandth is commonly called a thou (used for both singular and plural) or, particularly in North America, a mil (plural mils). The thickness of items such as paper, film, foil, wires, paint coatings, latex gloves, plastic sheeting, and fibers For example, most plastic ID cards A thousandth of an inch is a derived unit of length in a system of units using inches 14d4ca71ff

Prosthetic makeup draws a straight lineage from the stagecraft of theater and can be observed at the birth of science fiction cinema with Le Voyage dans La Lune, a 1902 French adventure short film directed by pioneer of special effects Georges Méliès. 14d4ca71ff

Gutta-percha The material is rigid, naturally biologically inert, resilient, electrically nonconductive, and thermoplastic, most commonly

sourced from Palaquium gutta; it is a polymer of isoprene which forms a rubber-like elastomer. Palaquium in the family Sapotaceae, which is primarily used to create a high-quality latex of the same name. The material is rigid, naturally biologically Gutta-percha is a tree of the genus Palaquium in the family Sapotaceae, which is primarily used to create a high-quality latex of the same name 14d4ca71ff

Allergy American Family Physician. PMID 14567487. Brehler R, Kütting B (April 2001). "Natural rubber latex allergy: An allergy is a specific type of exaggerated immune response where the body mistakenly identifies a ordinarily harmless substance (allergens, like pollen, pet dander, or certain foods) as a threat and launches a defense against it. 68 (7): 1325-32. practical guide to anaphylaxis" 14d4ca71ff

Allergic diseases are the conditions that arise as a result of allergic reactions, such as hay fever, allergic conjunctivitis, allergic asthma, atopic dermatitis, food allergies, and anaphylaxis. Symptoms of the above diseases may include red eyes, an itchy rash, sneezing, coughing, a runny nose, shortness of breath, or swelling. Note that food intolerances and food poisoning are separate conditions. 14d4ca71ff The main difference between dry suits and wetsuits is that dry suits are designed to prevent water from entering. This generally allows better insulation, making them more suitable for use in cold water. Dry suits can be uncomfortably hot in warm or hot air, and are typically more expensive and more complex to don. For divers, they add some degree of operational complexity and hazard as the... 14d4ca71ff The work of makeup artist Jack Pierce furthered pioneered early Hollywood prosthetic work and is best remembered for creating the iconic makeup worn by Boris Karloff in Frankenstein, his makeup for Lon Chaney Jr. in The Wolfman. 14d4ca71ff Modern prosthetic... 14d4ca71ff
