MLIR (software) MLIR (Multi-Level Intermediate Representation) is an open-source compiler infrastructure project developed as a sub-project of the LLVM project. It provides a modular and extensible intermediate representation (IR) framework intended to facilitate the construction of domain-specific compilers and improve compilation for heterogeneous computing platforms. The name "Multi-Level Intermediate Representation" reflects the system's ability to model computations at various abstraction levels and progressively lower them toward machine code. MLIR supports multiple abstraction levels in a single IR and introduces dialects, a mechanism for defining custom operations, types, and attributes tailored to specific domains. It provides MLIR (Multi-Level Intermediate Representation) is an open-source compiler infrastructure project developed as a sub-project of the LLVM project 52e8cacee2

Mark Flannery From 2000 to 2005, he was the Editor of the Journal of Money, Credit and Banking. Securities and Exchange Commission's Division of Economic and Risk Analysis.
