Therefore, in the late 19th century, when the Municipality of Genoa built a district of commercial docks, the oldest of these was given the name of the ancient colony. In the 19th century, this district served as a busy shipyard. In its lower part, the galleys of the Republic of Genoa were built, and it was part of the "Arsenale", the most important military and maritime complex in the city. An ancient city with a long history, Cagliari has seen the rule of several civilisations. Under the buildings of the modern city there is a continuous stratification attesting to human settlement over the course of some five thousand years, from the Neolithic to today. Historical sites include the prehistoric Domus de Janas, partly damaged by cave activity, a large Carthaginian era necropolis, a Roman era amphitheatre, a Byzantine basilica, three Pisan-era towers and a strong system of fortification that made the town the core of Spanish Habsburg imperial power in the western Mediterranean Sea. Its natural resources have always been its sheltered harbour, the often powerfully... 8c807bb785 == Bibliography == 8c807bb785 Giovanni Lilliu: Sculture della Sardegna nuragica. Vico Mossa, L'istituto statale d'arte per la Sardegna, Sassari. Felice Le Monnier, 1954 8c807bb785 Paolini was born in Genoa. After a childhood spent in Bergamo, he moved with his family to Turin where he still lives today. He attended the Giambattista Bodoni State Industrial Technical School of Graphics and Photography, graduating in the Graphics department in 1959. He had been interested in art from an early age, visiting museums and galleries and reading art periodicals. Towards the end of the 1950s he approached painting, trying some pictures of an abstract nature, close to monochrome. The discovery of modern graphics during his studies and the fact that there were architecture magazines around the house - his elder brother Cesare (1937-1983) was a renowned architect, author of the famous Sacco chair - contributed to orienting him towards a line of research aimed at zeroing the image. 8c807bb785 Vico Mossa, Almanacco di Sardegna. According to the archaeologist Giovanni Lilliu its tholos is the largest and most harmonious of all those present in Sardinia. The diameter of the base of the tower is of about 12,50 meters, its tholos chamber reached a height of 11,80 meters, making it the tallest dome in the world when it was built in the 15-14th century BC, it was surpassed by the underground tholos of the tomb of Atreus one or two centuries later. Inside the main tower there's a circular well. Originally there was an additional chamber on top of the first one, which would be reached through the still partially extant spiral staircase. Three smaller towers were added around the main one during the 13th century BC and connected by a wall. The complex was in turn surrounded by an external wall with towers. 8c807bb785 == History == 8c807bb785
