Breakthrough Listen signal of interest blc1 with a This is a list of several significant scientific events that occurred or were scheduled to occur in 2021 46a681439c

More formally, a metal-organic framework is a potentially porous extended structure made from metal ions and organic linkers. An extended structure is a structure whose sub-units occur in a constant ratio and are arranged in a repeating pattern. MOFs are a subclass of coordination networks, which is a coordination compound extending, through repeating coordination entities, in one dimension, but... 46a681439c The benefits of biodiversity are often evaluated in an anthropocentric way and the inherent value of biodiversity, outside of its benefits to humanity, has been debated by economists. Despite... 46a681439c

Newton's laws of motion example, a body's velocity vector might be  $\mathbf{v} = (3 \text{ m/s}, 4 \text{ m/s})$ , indicating that Newton's laws of motion are three physical laws that describe the relationship between the motion of an

object and the forces acting on it. These laws, which provide the basis for Newtonian mechanics, can be paraphrased as follows: 46a681439c

2015 in science The United Nations declared 2015 the International Year of Soils and Light-based Technologies. Gravitational waves were observed for the first time (announced publicly in 2016), and dwarf planets Pluto and Ceres were visited by spacecraft for the first time. a geoengineering solution to CO2 emissions could be found, it would not be enough to save the oceans. A new comprehensive analysis of global glacier A number of significant scientific events occurred in 2015. A new human-like species, Homo naledi, was first described. Gene editing based on CRISPR significantly improved 46a681439c

At any instant of time, the net force on a body is equal to the body's acceleration multiplied by its mass or, equivalently, the rate at which the body's momentum is changing with time. 46a681439c

Climate change in the Philippines All of these impacts together have greatly

affected the Philippines' agriculture, water, infrastructure, human health, and coastal ecosystems and they are projected to continue having devastating damages to the economy and society of the Philippines. caused by environmental hazards. Climate change, heavy rains, and increased temperatures are linked with the increased transmission of vector and waterborne Climate change is having serious impacts in the Philippines such as increased frequency and severity of natural disasters, sea level rise, extreme rainfall, resource shortages, and environmental degradation 46a681439c

Metal-organic framework (2022-02-14). The organic ligands included are sometimes referred to as "struts" or "linkers", one example being 1,4-benzenedicarboxylic acid ( $H_2bdc$ ). ; Huber, Dominik; Schuster, Michael; Albada, Bauke; Zuilhof, Han; Cokoja, Mirza; Fischer, Roland A. "Vectorial Catalysis in Metal-organic frameworks (MOFs) are a class of porous polymers consisting of metal clusters (also known as Secondary Building Units - SBUs) coordinated to organic ligands to form one-, two- or three-dimensional

structures. MOFs are classified as reticular materials. Stanley, Philip M 46a681439c

If two bodies exert forces on each other, these forces have the same magnitude but opposite directions. 46a681439c

Economics of biodiversity control can reduce economic losses incurred as a result of pests, disease vectors, and invasive species. However, its use can have unintended effects where Biodiversity plays an essential role in the global economy. In 2018, the WWF Living Planet Report argues that the whole global economy of US\$125 trillion ultimately relies on nature. Biodiversity plays a major role in the productivity and functioning of ecosystems, affects their ability to provide ecosystem services. Recreation and tourism are also examples of human economic activities that rely on these benefits. For example, biodiversity is a source of food, medication, and materials used in industry. This includes its role in providing ecosystem services - the benefits that humans get from ecosystems 46a681439c

2022-2023 global food crises These

include supply chain disruptions due to the COVID-19 pandemic, the Global energy crisis (2021-2023), the Russian invasion of Ukraine, and floods and heatwaves during 2021 (which destroyed key American and European crops). affected by many of the same issues. In 2022, the world experienced significant food price inflation along with major food shortages in several regions. Sub-Saharan Africa, Iran, Sri Lanka, Sudan and Iraq were most affected. Droughts were also a factor; in early 2022, some areas of Spain and Portugal lost 60-80% of their crops due to widespread. Many factors have contributed to the ongoing world food crisis. These issues range from greater heat stress to animal feed shortfalls and the spread of parasites and vector-borne diseases During 2022 and 2023 there were food crises in several regions as indicated by rising food prices. Prices of wheat, maize, oil seeds, bread, pasta, flour, cooking oil, sugar, egg, chickpea and meat increased 46a681439c

Woody plant encroachment (2021). Woody encroachment is observed across different ecosystems and with different characteristics and intensities globally.

Nature-based Solutions for Climate Change in the UK: A Report by the British

Woody plant encroachment (also called woody encroachment, bush encroachment, shrub encroachment, shrubification, woody plant proliferation, or bush thickening) is a natural phenomenon characterised by the area expansion and density increase of woody plants, bushes and shrubs, at the expense of the herbaceous layer, grasses and forbs. , eds. ; Watts, O. ; McKain, S. ; Morrison-Bell, C. D. ; Morecroft, M. It refers to the expansion of native plants and not the spread of alien invasive species. It predominantly occurs in grasslands, savannas and woodlands and can cause regime shifts from open grasslands and savannas to closed woodlands 46a681439c

A body remains at rest, or in motion at a constant speed in a straight line, unless it is acted upon by a force. 46a681439c

Textile industry in Bangladesh JSTOR 24461672. ; Strümpell, Christian; Fischer, Joachim E. 3% increase in the past year according to the Export Promotion Bureau (EPB). Exports of
