In-water surface cleaning This often refers to removing marine fouling growth from ship hulls, but also has applications on civil engineering structures, pipeline intakes and similar components which are impossible or inconvenient to remove from the water for maintenance. In-water cleaning, also known as in-water surface cleaning, is a collection of methods for removing unwanted material in-situ from the underwater surface. In-water cleaning, also known as in-water surface cleaning, is a collection of methods for removing unwanted material in-situ from the underwater surface of a structure. Many applications require the intervention of a diver, either to provide the power, or to direct a powered tool. It does not generally refer to cleaning the inside of underwater or other pipelines, a process known as pigging bc7f2b7e40

Oxygen compatibility 1. **Cleaning agents** Oxygen compatibility is the issue of compatibility of materials for service in high concentrations of oxygen. Oxygen cleaning may be required for concentrations as low as 23% Other common specifications for oxygen cleaning include ASTM G93 and CGA G-4. It is a critical issue in space, aircraft, medical, underwater diving and industrial applications bc7f2b7e40

It is concerned with managing an entire production system that converts inputs (in the forms of raw materials, labor, consumables, and energy) into outputs (in the form of goods and services for consumers). Operations management covers sectors like banking systems, hospitals, companies,

In 2000, NIRS' affiliation with World Information Service on Energy (WISE) turned it into an international organization (NIRS/WISE). bc7f2b7e40 Understanding of fire hazards is necessary when designing, operating, and maintaining oxygen systems so that fires can be prevented. Ignition risks can be minimized by controlling heat sources and using materials that will not ignite or will not support burning in the applicable environment. Some materials are more susceptible to ignition in oxygen-rich environments, and compatibility should be assessed before a component is introduced... bc7f2b7e40 Aspects include effects of increased oxygen concentration on the ignition and burning of materials and components exposed to these concentrations in service. bc7f2b7e40

Housekeeping This is a more broad role than a cleaner, who is focused only on the cleaning aspect.
