History of logarithms The idea of logarithms was also used to construct the slide rule (invented around 1620–1630), which was ubiquitous in science and engineering until the 1970s. exponential function or as the integral of $1/x$, Napier worked decades before calculus was invented, the exponential function was understood, or coordinate geometry The history of logarithms is the story of a correspondence (in modern terms, a group isomorphism) between multiplication on the positive real numbers and addition on real number line that was formalized in seventeenth century Europe and was widely used to simplify calculation until the advent of the digital computer. Hobson called it "one of the very greatest scientific discoveries that the world has seen. Tables of logarithms were published in many forms over four centuries. " Henry Briggs introduced common (base 10) logarithms, which were easier to use. W. The Napierian logarithms were published first in 1614. E. A breakthrough generating 7f20815497
