Early scholars initially thought that the stone was carved in the 1470s, though modern research suggests that it was carved some time between 1502 and 1521. Following its rediscovery, the sun stone was mounted on an exterior wall of the cathedral, where it remained until 1885. It measures 3. The Cal was originally created by the British art director Derek Forsyth. After an unpublished mockup in 1962, it became an annual publication from 1964. In some of the earlier calendars Pirelli tyres featured prominently, though this marketing aspect was later dropped. The first woman photographer to shoot the calendar was Sarah Moon in 1972. Publication was discontinued after the 1974 issue as an economizing cutback in response to the world...

The motivations for Occupy Wall Street largely resulted from public distrust in the private sector during the aftermath of the Great Recession in the United States. There were many particular points of interest leading up to the Occupy movement that angered populist and left-wing groups. For instance, the 2008 bank bailouts under the George W. Bush administration utilized congressionally appropriated taxpayer funds to create the Troubled Asset Relief Program (TARP), which purchased toxic assets from failing banks and financial institutions. The U.S. Supreme Court ruling in Citizens United v. FEC in January 2010 allowed corporations to spend unlimited amounts on independent political expenditures without government regulation. Many viewed the ruling as a way for moneyed interests to corrupt public institutions and legislative bodies, such as the United States... The calendar is produced with limited availability (20,000 are printed annually). Copies do not go on sale, but are instead given as corporate gifts to celebrities and select Pirelli customers. The annual production cost was about US\$2 million in 2017. Marco Tronchetti Provera, Pirelli's CEO from 1992 to 2022, commented that the purpose of the Cal is "to mark the passing of time" by recording the zeitgeist.

Although the exact date of its creation is unknown, the name glyph of the Aztec ruler Moctezuma II (Moctezuma Xocoyotzin) in the central disc dates the monument to his reign between 1502 and 1520. There are no clear indications about the authorship or purpose of the monolith, although there are certain... c310bf410b Due to the use of 28 sol months, the Darian calendar has no mechanism for synchronization with Earth dates or its synodic periods. It is specifically engineered for Martian cycles, whereas the Gregorian calendar is built for Earth's orbital period and day length. For future settlers, the two systems serve different roles: one provides local seasonal accuracy on Mars, while the other maintains a connection to Earth's legal and social standards. c310bf410b == History == c310bf410b
