Domesticated plants and animals of Austronesia S2CID 15456546. (2007). doi:10. 1017/S0003598X00067934. These migrations were accompanied by a set of domesticated, semi-domesticated, and commensal plants and animals transported via outrigger ships and catamarans that enabled early Austronesians to thrive in the islands of maritime Southeast Asia, near Oceania, remote Oceania, Madagascar, and the Comoros Islands. Ploetz, Randy C. "Banana and plantain One of the major human migration events was the maritime settlement of the islands of the Indo-Pacific by the Austronesian peoples, believed to have started from at least 5,500 to 4,000 BP (3500 to 2000 BCE). ; Kepler, Angela Kay; Daniells, Jeff; Nelson, Scott C. 544–558 def7354321

Illustris project Paul; Sijacki, Debora; Xu, Dandan; Snyder, Greg; Nelson, Dylan; Hernquist, Lars (14 May 2014). Early results were described in a number of publications following widespread press coverage. "Introducing the Illustris Project: Simulating the coevolution The Illustris project is an ongoing series of astrophysical simulations run by an international collaboration of scientists. The aim is to study the processes of galaxy formation and evolution in the universe with a comprehensive physical model. The Illustris simulation framework and galaxy formation model has been used for a wide range of spin-off projects, starting with Auriga and IllustrisTNG (both 2017) followed by Thesan (2021), MillenniumTNG. The project publicly released all data produced by the simulations in April, 2015. Key developers of the Illustris simulation have been Volker Springel (Max-Planck-Institut für Astrophysik) and Mark Vogelsberger (Massachusetts Institute of Technology) def7354321

Fermi paradox "The Kepler Mission The Fermi paradox is the discrepancy between the lack of conclusive evidence of advanced extraterrestrial life and the apparently high likelihood of its existence. From "Kepler: About the Mission". March 31, 2015. Archived from the original on April 20, 2012. NASA. Retrieved March 30, 2016. Those affirming the paradox generally conclude that if the conditions required for life to arise from non-living matter are as permissive as the available evidence on Earth indicates, then extraterrestrial life would be sufficiently common such that it would be implausible for it not to have been detected def7354321
