

Robust Control Of Inverted Pendulum Using Fuzzy Sliding

Nominator(s): — Amakuru (talk) 06:48, 8 October 2021 (UTC); The Rambling Man[reply] b0933438ad The traditional or conventional approach to solving computing problems is either to build mathematical models or to use an IF- THEN -ELSE structure. For example, a brute-force search is used in many chess engines, but this approach is computationally expensive and sometimes may arrive at poor solutions. It is for problems like this that lateral computing can be useful to form... b0933438ad

UEFA Euro 2020 Final[edit] b0933438ad ==A==Isixhosa b0933438ad This article is about the final of Euro 2020, the football tournament which took place a few months ago (even though it's 2021!). As someone from England, this was a tough one to write about - it was first major final that the team have reached in my lifetime, and with England holding the lead into the second half it looked for while like it... b0933438ad

Lateral thinking has been made popular by Edward de Bono. This thinking technique is applied to generate creative ideas and solve problems. Similarly, by applying lateral-computing techniques to a problem, it can become much easier to arrive at a computationally inexpensive, easy to implement, efficient, innovative or unconventional solution. b0933438ad The article was promoted by Ian Rose via FACBot (talk) 31 October 2021 [1]. b0933438ad
