Neuropsychological assessment During and following the Second World War, Luria conducted extensive research with large cohorts of brain-injured Russian soldiers. Luria is widely regarded as a foundational figure in the field of neuropsychological assessment. A significant advancement in this area occurred between 1942 and 1948, when Soviet neuropsychologist Alexander Luria developed the first systematic neuropsychological assessment, comprising a battery of behavioral tasks designed to evaluate specific aspects of behavioral regulation. His neuropsychological test battery was later adapted Over the past three millennia, scholars have attempted to establish connections between localized brain damage and corresponding behavioral changes 768b0a3bdf

In the United States undergraduate and graduate psychology programs generally do not offer a "track" in pediatric neuropsychology, per se. Specific supervised training in pediatric neuropsychology typically begins at the internship or postdoctoral level, as the graduate student is completing or has just completed a PhD or PsyD in clinical child psychology, pediatric psychology, clinical neuropsychology, or school psychology. 768b0a3bdf
