E-government Through ListSrvs, RSS feeds, mobile messaging, micro-blogging services and blogs, government and its agencies can share information to E-government (known for electronic government) involves utilizing technology devices, such as computers and the Internet, for faster means of delivering public services to citizens and other persons in a country or region. E-government offers new opportunities for more direct and convenient citizen access to government and for government provision of services directly to citizens. services they receive fd2a035718

List of datasets for machine-learning research "TCFD Knowledge - These datasets are used in machine learning (ML) research and have been cited in peer-reviewed academic journals. Hacking Tutorials. Although they do not need to be labeled, high-quality datasets for unsupervised learning can also be difficult and costly to produce. High-quality labeled training datasets for supervised and semi-supervised machine learning algorithms are usually difficult and expensive to produce because of the large amount of time needed to label the data. Retrieved 1 April 2023. Datasets are an integral part of the field of machine learning. Retrieved 1 April 2023. "Hacking Tutorials The best Step-by-Step Hacking Tutorials". MITRE. Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability of high-quality training datasets fd2a035718

E- government involves digital interactions across various levels and stakeholders (C2G), between governments and other government agencies (G2G), between government and citizens (G2C), between government and employees (G2E), and between government and businesses/commerces (G2B). E-government delivery models can be

broken down into the following categories: This interaction consists of citizens communicating with... fd2a035718

MSN MSN is based in the United States and offers international versions of its portal for dozens of countries around the world. However, it added some customizability MSN is a web portal and related collection of Internet services and apps provided by Microsoft. "My MSN", which was made up of customized RSS feeds, as the new website no longer supported user-specified RSS content. Its dedicated app is currently available for iOS and Android systems. The main home page provides news, weather, sports, finance and other content curated from hundreds of different sources that Microsoft has partnered with fd2a035718

2020–2021 Indian farmers' protest Related endemic legacy issues include farmer suicides and. The Union Government, however, maintained that the laws would make it effortless for farmers to sell their produce directly to big buyers, and stated that the protests are based on misinformation. Prasad, the justice and technology minister, told India's parliament: "I politely remind the companies, whether it is Twitter, Facebook, LinkedIn or WhatsApp The 2020–2021 Indian farmers' protest was a protest against three farm acts passed by the Parliament of India in September 2020. The acts, often called the Farm Bills, had been described as "anti-farmer laws" by many farmer unions, and politicians from the opposition who said that the three laws would leave farmers at the "mercy of corporates" since the farmer-trader disputes were taken to SDM instead of judiciary. The protests demanded the creation of a minimum support price (MSP) bill, to ensure that corporates cannot control the prices fd2a035718

Many organizations, including governments, publish and share their datasets. The datasets... fd2a035718 Geotagging can help users find a wide variety of location-specific information from a device. For instance, someone can find images taken near a given location by entering latitude and longitude coordinates into a suitable image search engine. Geotagging-enabled information services can also potentially be used to find location-based news, websites, or other resources. Geotagging can... fd2a035718

Blog In the 2010s, multi-author blogs (MABs) emerged, featuring the

writing of multiple authors and sometimes professionally edited. In the 2000s, blogs were often the work of a single individual, occasionally of a small group, and often covered a single subject or topic. communication. Corporate and organizational blogs A blog can be private A blog (a truncation of "weblog") is an informational website consisting of discrete, often informal diary-style text entries also known as posts. The rise of Twitter and other "microblogging" systems helps integrate MABs and single-author. Examples of these include Twitter, Facebook, Tumblr and, by far the largest, Weibo. MABs from newspapers, other media outlets, universities, think tanks, advocacy groups, and similar institutions account for an increasing quantity of blog traffic. Posts are typically displayed in reverse chronological order so that the most recent post appears first, at the top of the web page fd2a035718

RSS News aggregators (or "RSS readers") can be built into a browser, installed on a desktop computer, or installed on a mobile device. Subscribing to RSS feeds can allow a user to keep track of many different websites in a single news aggregator, which constantly monitors sites for new content, removing the need for the user to manually check them. RSS (RDF Site Summary or Really Simple Syndication) is a web feed that allows users and applications to access updates to websites in a standardized, RSS (RDF Site Summary or Really Simple Syndication) is a web feed that allows users and applications to access updates to websites in a standardized, computer-readable format fd2a035718
