Open reports: Review reports are published alongside the relevant article (rather than being kept confidential). These modifications are supposed to address various perceived shortcomings of the traditional scholarly peer review process, in particular its lack of transparency, lack of incentives, wastefulness, bullying and harassment.

Scholarly peer review If the identities of authors are not revealed to each other, the procedure is called dual-anonymous peer review. "Publishing: The peer-review scam" Scholarly peer review or academic peer review (also known as refereeing) is the process of having a draft version of a researcher's methods and findings reviewed (usually anonymously) by experts (or "peers") in the same field. peer review fraud in Tumor Biology papers (Retrieved April 25, 2017) Ferguson C, Marcus A, Oransky I (November 2014). Peer review is widely used for helping the academic publisher (that is, the editor-in-chief, the editorial board or the program committee) decide whether the work should be accepted, considered acceptable with revisions, or rejected for official publication in an academic journal, a monograph or in the proceedings of an academic conference

Do-it-yourself biology DIY biology is primarily undertaken by individuals with limited research training from academia or corporations, who then mentor and oversee other DIY biologists with little or no formal training. It includes designing and constructing biological modules, biological systems, and biological machines, or re-designing existing biological systems for useful purposes. In order to produce predictable and robust systems with novel functionalities that do not already exist in nature, it is necessary to apply the engineering
