Wind power is the largest source of renewable energy in the UK, but at under 5% still far less primary energy than oil or fossil gas. However, wind power generates electricity which is far more powerful in terms of useful energy than the same amount of thermal primary energy. Wind generates more than a quarter of UK electricity, and as of May

2024 generates more than gas over a whole year. b052f753f5 Link is not on the blacklist. b052f753f5
