Article 23 establishes the composition of the Security Council, with five permanent members (the Republic of China, (currently People's Republic of China), France, the Soviet Union (Now Russian Federation), the United Kingdom, and the United States) and 10 non-permanent members elected by the General Assembly. The non-permanent members serve two year terms and cannot be immediately re-elected. In the selection process for these non-permanent members, the treaty calls for "due regard being specially paid, in the first instance to the contribution of Members of the United Nations to the maintenance of international peace and security and to the other purposes of the Organization, and... b75cbd190f

The other branches of geography, most commonly limited to human geography and physical geography, can usually apply the concepts and techniques of technical geography. Nevertheless, the methods and theory are distinct, and a technical geographer may be more concerned with the technological and theoretical concepts

than the nature of the data. Further, a technical geographer may explore the relationship between the spatial technology and the end users to improve upon the technology and better understand the impact of the technology on human behavior. Thus, the spatial data types a technical geographer employs may vary... b75cbd190f
