Described in the 1985 book *The Klingon Dictionary* by Marc Okrand, and deliberately designed to sound "alien", Klingon has a number of typologically uncommon features. The language's basic sound, along with a few words, was devised by actor James Doohan ("Scotty") and producer Jon Povill for *Star Trek: The Motion Picture*. The film marked the first time the language had been heard. In all previous appearances, Klingons spoke in English, even to each other. Klingon was subsequently developed by Okrand into a full-fledged language. e111a094bb Once the RFC process was complete, Wall reviewed and classified each of the 361 requests received. He then began the process of writing several "Apocalypses", using the original meaning... e111a094bb

Guide dog The human does the directing, based on skills acquired through previous mobility training. Thomas of Celano quotes Saint Francis of Assisi as saying, "I saw at one time - he added - a blind man Guide dogs (colloquially known in the US as seeing-eye dogs) are assistance dogs trained to lead people who are blind or visually impaired around obstacles. In several countries guide dogs, along with most other service and hearing dogs, are exempt from regulations against the presence of animals in places such as restaurants and public transportation. The handler might be likened to an aircraft's navigator, who must know how to get from one place to another, and the dog is the pilot, who gets them there safely. reference to guide dogs yet dates back to the year 1247. Although dogs can be trained to navigate various obstacles, they are red-green colour blind and incapable of interpreting street signs e111a094bb

Introduced species Common examples include An introduced species, alien species, exotic species, adventive species, immigrant species, foreign species, non-indigenous species, or non-native species is a species living outside its native distributional range, but which has arrived there by human activity, directly or indirectly, and either deliberately or accidentally. At that time, the primary goals were to remove "historical warts" from the language; "easy things should stay easy, hard things should get easier, and impossible things should get hard"; and a general cleanup of the internal design and application programming interfaces (APIs). The process began with a series of Request for Comments (RFCs). This process was open to all contributors, and left no aspect of the language closed to change. e111a094bb == History == e111a094bb Covering a variety of genres within and beyond the conventional pop/rock axis of most music press, the reviews are composed in a concentrated, fragmented prose style characterized by layered clauses, caustic wit, one-liner jokes, political digressions, and allusions ranging from common knowledge to the esoteric. == Biography == e111a094bb Unlike the two-body problem, the three-body problem has no general closed-form analytic solution. The differential equations that govern the motions of three gravitating bodies are not integrable and cannot be solved to give explicit formulas for the positions of the bodies as a function of time. For most initial conditions, the dynamical system for three orbiting bodies is chaotic, and the only way to predict their motions is to estimate them using numerical methods. e111a094bb

School of Philosophy and Economic Science The Practical Philosophy course involves a meditative process known as "The Awareness Exercise" The School of Philosophy and Economic Science (SPES), also operating under the names the School of Philosophy and the School of Practical Philosophy and legally named the School of Economic Science (SES), is a worldwide organisation based in London. It offers non-academic courses for adults, primarily influenced by Advaita Vedanta, an orthodox philosophical system of Hinduism. The organisation advocates conservative values with traditional gender roles and sexual ethics. It has been described as a cult, sect, or new religious movement, including by several former members. with Justice", and other courses including Sanskrit language. As one of the last remaining lamas to have received a complete Buddhist education in pre-1959 Tibet, Tarthang Tulku left Tibet and taught in Benares, India, until emigrating to the United States of America in 1969 with his wife, the poet Nazli Nour. After settling in Berkeley, CA they established the Tibetan Aid Project (TAP) which serves the needs of the Tibetan refugee community. e111a094bb In the first Belarusian census in 1999, the Belarusian language was declared a "language spoken at home" by about 3,686,000 Belarusian citizens (36.7% of the population). Historically, the first specific three-body problem to receive extended study was the one involving the Earth, the Moon, and the Sun. In an extended modern sense, a three-body problem is any problem in classical mechanics or quantum mechanics that models the motion of three particles. e111a094bb In 1963, Tarthang Tulku founded Dharma Publishing in Varanasi, India. In 1971, the publishing house moved to California. Three-body problem motion of the third body. " The restricted three-body problem is easier to analyze theoretically than the full problem. It is of practical interest as well In physics, specifically classical mechanics, the three-body problem is to take the initial positions and velocities (or momenta) of three point masses orbiting each other in space and then to calculate their subsequent trajectories using Newton's laws of motion and Newton's law of universal gravitation e111a094bb

To some extent, Russian, Ukrainian, and Belarusian retain a degree of mutual intelligibility. Belarusian descends from a language generally referred to as Ruthenian (13th to 18th centuries), which had, in turn, descended from what is referred to as Old East Slavic (10th to 13th centuries). e111a094bb
