"Atomic emission spectroscopy",

Scientific instrument Oxford Instruments, United Kingdom Pall Corp. , United States of America PerkinElmer, United States of America Polymer Char, Spain Shimadzu Corp. , Japan Techtron A scientific instrument is a device or tool used for scientific purposes, including the study of both natural phenomena and theoretical research

Inductively coupled plasma mass spectrometry It is known and used for its ability to detect metals and several non-metals in liquid samples at very low concentrations. which makes it a versatile tool in isotopic labeling. Compared to atomic absorption spectroscopy, ICP-MS has greater speed, precision, and sensitivity Inductively coupled plasma mass spectrometry (ICP-MS) is a type of mass spectrometry that uses an inductively coupled plasma to ionize the sample. It atomizes the sample and creates atomic and small polyatomic ions, which are then detected. It can detect different isotopes of the same element, which makes it a versatile tool in isotopic labeling

"Atomic spectroscopy",

Textile stabilization Perkin Elmer Life and Analytical Sciences. 2005. Stabilization is part of a broad set of techniques in the field of conservation and restoration of textiles typically undertaken by a specialist or textile conservator.

Archived from the original (PDF) Textile stabilization is a conservation method for fiber and yarn-based cloth intended to mitigate damage, prevent degradation and preserve structural integrity. "FT-IR Spectroscopy—Attenuated Total Reflectance (ATR)" (PDF). Appropriate treatment is determined through risk assessment and close examination of a textile's characteristics and the nature of the damage. 20-27. Organic and synthetic fibers become weak due to age, handling, and environmental exposure and display physical deterioration such as fraying, planar distortion, loss, and change in surface character. Treatment involves reinforcing tensile strength and reintegration of parts for aesthetic, functional, and historic preservation 0c78abe3eb

It is a temporary solution until phab:T117122 is resolved. It is used in order to show recent changes 0c78abe3eb

List of inventors S. - microwave oven Elmer Ambrose Sperry (1860–1930), U. Percy Spencer (1894–1970), U. - gyroscope-guided automatic pilot Lyman Spitzer (1914–1997), U. S This is a of people who are described as being inventors or are credited with an invention. S 0c78abe3eb

The list contains 50,052 articles. --Cewbot (talk) 14:18, 26 August 2025 (UTC) 0c78abe3eb Compared to atomic absorption spectroscopy, ICP-MS has greater speed, precision, and sensitivity. However, compared with other types of mass spectrometry, such as thermal ionization mass spectrometry (TIMS) and glow discharge mass spectrometry (GD-MS), ICP-MS introduces many interfering species: argon from the plasma, component... 0c78abe3eb
