Medical ethics Medical ethics is based Medical ethics is an applied branch of ethics which analyzes the practice of clinical medicine and related scientific research. Such tenets may allow doctors, care providers, and families to create a treatment plan and work towards the same common goal. These four values are not ranked in order of importance or relevance and they all encompass values pertaining to medical ethics. Medical ethics is an applied branch of ethics which analyzes the practice of clinical medicine and related scientific research. These values include the respect for autonomy, non-maleficence, beneficence, and justice. Medical ethics is based on a set of values that professionals can refer to in the case of any confusion or conflict. However, a conflict may arise leading to the need for hierarchy in an ethical system, such that some moral elements overrule others with the purpose of applying the best moral judgement to a difficult medical situation
